ADMS Example: W3C SKOS

Asset: SKOS W3C working Group Note 18 August 2009

Property	Value
Date of Creation	2009-08-18
Date of Last Modification	2009-08-18
Description	This document is a Working Group Note published by the Semantic Web Deployment Working Group, part of the W3C Semantic Web Activity. This version is an update to the previous Working Draft of 15 June 2009. This version includes several minor editorial changes as well as removing an example that suggested one means to reference a system of notation (e.g. a symbolic notation) in a label where the system of notation does not correspond to a natural language. This suggestion was deemed inconsistent with IETF Best Current Practice 47 on the use of tags for identifying languages. Users should consider the SKOS Extension vocabulary for support of alternate systems of notation....
