

# *Entities for eGov Interoperability - Methodology Workshop*

Brussels, Feb 2<sup>nd</sup> 2009

Klaus Reichling, ]init[

## Same Goal – Different Scope

Projects (national and pan-European)

Bilateral / multilateral **exchange of data**

Member State Initiatives

National **Standardisation of data models / formats**

SEMIC.EU

European **harmonisation of data models and formats**

➔ How to achieve interoperable exchange of data?

## Only one Methodology?

- Various approaches exist in different Member States, national, European and international environments
- Methods have been developed (or derived from existing methods) to meet specific requirements
- Based on related / similar concepts

## Goals of this workshop

- Overview / Orientation
  - What methodologies exist?
  - What are the common denominators?
  - What experiences exist in Member states and projects?
  - What are strength and weaknesses?
- Common understanding of the Semantics of modelling methodologies
- Develop recommendations for Projects, MS initiatives and SEMIC.EU

## How do we proceed?

- Controlled Vocabularies and Naming Conventions
- Methodology Synopsis
  - Presentations from 6 Member States
- Exchange experiences on methodology
  - Panelists from 12 Member States and pan European projects
- Landscape of methodologies
- Conclusion and next steps

Let's go!
