Promet'Apps Example – DocGen

The screenshot displays the Promet'Apps interface for 'Elaboration CDC_V3'. On the left, there is a navigation menu with options like 'MyPROMETA', 'Préférences', 'Administration', and 'Accueil'. The main area shows a workflow diagram with various process steps and decision points (XOR). A red box highlights a specific part of the diagram, and a red arrow points from the text 'Hidden for users' to this box. Below the diagram, there are buttons for 'Sauvegarder', 'Annuler', 'Précédent', and 'Suivant'. On the right side, there is a preview of a document titled 'CAHIER DES CHARGES' with a table of contents.

Example of a DocGen use for the public tender documentation generation based on the modelling of the law (NextGen Portal Promet'Apps - DocGen)
