

DCAT-AP the story so far

13 May 2016, Rome ISA Programme Action 1.1

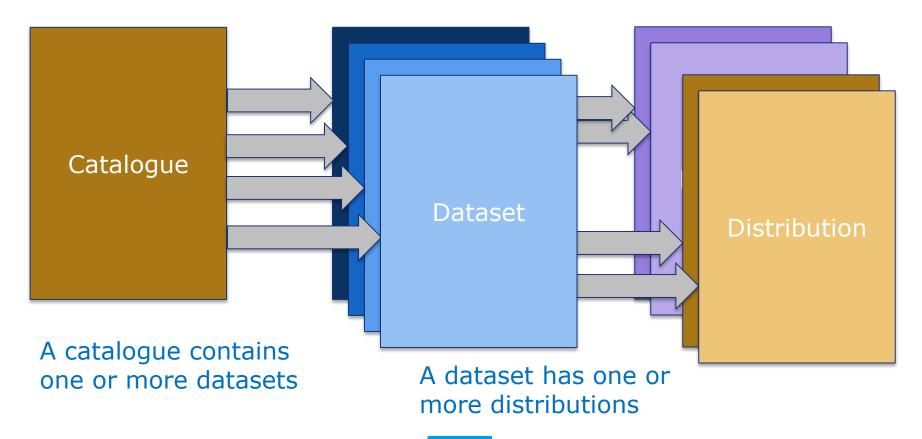

Introduction: DCAT-AP

- DCAT-AP is an Application Profile of the W3C DCAT Recommendation to be used for the exchange of descriptions of datasets between data portals in Europe
- DCAT was developed by the Government Linked Data Working Group at W3C in 2012-2013 as an RDF vocabulary designed to facilitate interoperability between data catalogues published on the Web
- DCAT-AP was developed by the SEMIC activity under the ISA programme in 2013 and revised in 2015 for specific use in Europe, among others to support the European Data Portal

Introduction: DCAT-AP

Update

DCAT-AP since SEMIC 2015

October 2015

Publication of DCAT-AP 1.1

December 2015

Publication of GeoDCAT-AP 1.0

May 2016

SEMIC 2016 Conference, Rome

May 2015

SEMIC 2015 Conference, Riga

November 2015

Launch of the European

Data Portal

March 2016

Publication of the DCAT-AP implementation guidelines

September 2016

Finalisation & publication of StatDCAT-AP

Revision of DCAT-AP

Outcomes

- Updated version of DCAT-AP: v1.1
- Changes based on requests from the implementer community

What has changed?

- Changes in recommended and optional classes and properties adms:versionNotes, dcat:contactPoint, dct:LicenseDocument, dct:Location, owl:versionInfo, vCard:Kind, dcat:landingPage
- Changes in the recommended controlled vocabularies for dcat:mediaType, dct:spatial, dcat:themeTaxonomy, dcat:theme, dct:accrualPeriodicity
- New properties, such as:

dct:conformsTo and dct:language as a recommended properties for Catalogue Record dct:provenance and dct:source as optional properties for Dataset

New class: Checksum

GeoDCAT-AP

Objectives

- Developing an extension to DCAT-AP for geospatial metadata
- Take into account the **standards** currently used in the geospatial community
 - INSPIRE
 - o ISO19115

Outcomes

- 2 profiles
 - Core: DCAT-AP conformant representation of geospatial information
 - Extended: comprehensive RDF-based representation of geospatial metadata, based on widely used vocabularies.
- Syntax binding from INSPIRE metadata schema & ISO19115:2003 to the GeoDCAT-AP RDF
- Recommendations to the DCAT-AP revision working group
- Controlled vocabularies

Open Data

Flanders

DCAT-AP Implementation Guidelines

Outcomes

- Practical guidelines for implementing DCAT-AP
- Based on contributions from the implementer community
 European Data Portal, EU Open Data Portal, Open Data Portals in Belgium, Italy, Norway, Spain, Sweden, Switzerland and The Netherlands
- Input for future DCAT-AP revisions
- Available via https://joinup.ec.europa.eu/node/148075/

Extending DCAT-AP

Provenance

Contact information

Identifiers for datasets & distributions

DCAT-AP Tools

StatDCAT-AP

Objectives

- Fully conformant **extension** of DCAT-AP for the exchange of metadata for statistical datasets
 - determining which description elements in **statistical data standards** can be exposed in the DCAT-AP format
 - extending the DCAT-AP with descriptive elements that can further help in the discovery and use of statistical data sets
- General data portals will understand the 'core' of StatDCAT-AP (which is DCAT-AP)
- General data portals get the opportunity to enhance services by processing the additional properties in StatDCAT-AP; after all, statistical datasets are an important collection for portals

StatDCAT-AP

Status

- 8 open issues. Join the discussion via
 - Joinup: <u>https://joinup.ec.europa.eu/asset/stat_dcat_application_profile/issue/all</u>
- Next steps
 - Face-to-face meeting this afternoon
 - End of May 2016: third draft
 - 3 June 2016: fourth virtual WG meeting
 - July and August 2016: public review period
 - Mid-September 2016: fifth virtual WG
 - End of September 2016: approval of StatDCAT-AP version 1.0 for publication
