### Public Administration of the 21st century

The action plan aims to modernise the public administration in the European Union, to enable businesses and citizens to access them from anywhere the way they wish, and to engage online. Let us, the Commission and your own government, know your ideas, build on others ideas, vote on ideas and monitor the implementation of the selected ideas.

Be active; express your ideas to build the public administration of the future, today.

The Commission give you the opportunity to participate in this transformation.

# Next phases

- Relations: (march/april)
  - release of "relations" functionality to let users connect contents between each-other.
  - release of "organisation" presented close to user name.
- Workflows: (may/june)
  - release of basic "workflow" approach :  
Editors may decide to give more importance to some of their comments to communicate about a current status. Once an idea is considered for action, commenting may be closed by editors as a result that only editors may continue to post comments that are used, in that case, to communicate about current status (action taken, implementation...)
- Progressive work:
  - Notifications
  - Counter for days remaining before evaluation period
  - Statistics
  - Groupware
