

CAMSS

**Common
Assessment
Method for
Standards and
Specifications**

- ISA aims to foster interoperability between public administrations by helping to establish common approaches that will make collaboration easier.

- The goal: avoid vendor lock-in through the use of standards
- The solution: Public administrations establish lists of standards (recommended/mandatory/comply-or-explain)
- The problem: How to select standards in an objective and defensible way?
- The tool: A common set of criteria

What is CAMSS

- a method to assess standards and specifications in the field of ICT
- based on the best practices of the Member States and
- aligned with the Regulation on European Standardisation.
- enables the sharing and reuse of assessments of ICT standards and specifications.

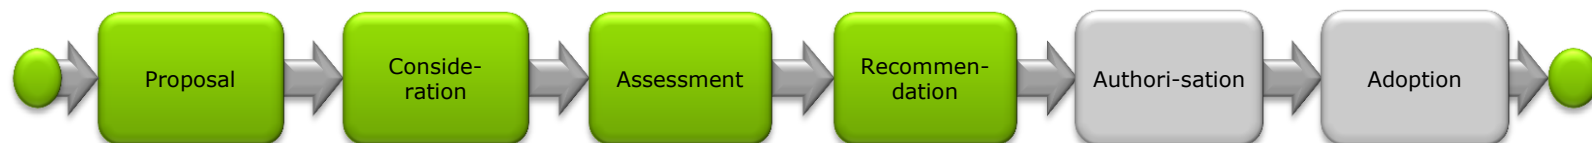

SHARE & REUSE

How does it work?

- *Assessment scenario 1*: An assessment of a standardisation organisation
- *Assessment scenario 2*: An assessment of a technical specification or a standard for adoption by public administrations
- *Assessment scenario 3*: An assessment and selection of technical specification or standard for specific business needs and requirements
- *MSP scenario*

SC1	9	3	12
SC2	21	5	52
SC3	21	5	52

The community includes:

- Access to the CAMSS tools, CAMSS wiki and CAMSS library with assessments carried out by Member States
- A growing member list
- A place to interact and discuss about Standards Assessments.
- Downloadable versions of the CAMSS tools with guidelines

New and future improvements:

- A new version of CAMSS has been released containing the MSP assessment form as a subset.
- A future online version of the CAMSS tool for the realisation of the assessments will be available.

- Improved search and access to the assessments in the library.

Select	Scenario	Standard Name	Year	Member State	Contact person	User Tag	Export	ICT Domain
<input type="checkbox"/>	#2	Standard T	2013	Germany	Thomas J.	INDIVIDUAL	Export	IT security
<input type="checkbox"/>	#2	Standard S	2012	Belgium	Amaury D.	MS	Export	IT security
<input type="checkbox"/>	#MSP	Stan			Thomas J.	MSP	Export	IT security

- Updated list of standards and assessments creation.

The current state of play of recommended / mandatory ICT standards and specifications is as follows:
 415 standards in total are mandatory or recommended in 13 Member States
 118 standards in total are mandatory or recommended in at least 2 Member States
 This overlap illustrates the efforts made by Member States and signals the scope for sharing and reuse of the assessments and lists of mandatory / recommended ICT standards and specifications
