

What is PM²?

PM² is a Project Management Methodology developed and supported by the European Commission. Its purpose is to enable project teams to manage their projects effectively and deliver solutions and benefits to their organisations and stakeholders.

PM² is an open, mature, light and easy to implement methodology. PM² has been developed to fit the specific needs, culture and constraints of the EU institutions and Public Administrations. Still, as it incorporates elements from globally accepted best-practices, standards and methodologies, it is suitable to any type of environment or project.

PM² provides:

- A Project Governance Model (i.e. roles & responsibilities)
- A Project Lifecycle (i.e. project phases)
- A set of Processes (i.e. project management activities)
- A set of Project Artefacts (i.e. templates and guidelines).
- A set of Mindsets (i.e. effective beliefs and behaviours).

What is PM²-Agile?

Agile is an approach described by a set of principles and practices for managing projects. Agile appreciates the inherent uncertainty of project environments and creates organisations that are highly adaptive, use adaptive planning and short feedback loops, evolutionary development, early delivery, continuous improvement and rapid response to change.

PM²-Agile both extends and enhances the PM² Methodology with Agile principles and practices and provides an alignment between these practices and corporate governance, programme management, operations, enterprise architecture.

QUICKSTART STEPS

- 1 Define a Project Governance and create a Business Case**
 - Define the Project Steering Committee (PSC)
 - Provide the justification for the project, capture the business requirements and establish budgetary constraints

[Business Case](#)
- 2 Identify Stakeholders and create the Project Charter**
 - Define the project scope
 - Identify stakeholders that should contribute to the Project Charter
 - Capture the high-level requirements, assumptions and constraints
 - Decide on a project approach, estimate required resources, costs and timing

[Project Charter](#)
- 3 Set-up the Project Logs**
 - Set-up the Risk Log, Issue Log, Decision Log and the Change Log. These logs will be used to document the management of Risks, Issues, Decisions and project Changes

[Issue Log, Risk Log, Decision Log, Change Log](#)
- 4 Kick-off the Project Planning with a Meeting**
 - Invite all participants to the planning meeting
 - Go over the Project Charter and ensure a common understanding
 - Communicate the next steps for the planning phase

[Planning Kick-off Meeting](#)
- 5 Tailor the Project Management approach**
 - Decide on planning documents to use and how they should be tailored
 - Define rules, assign team responsibilities and define a conflict resolution process

[Project Handbook](#)
- 6 Develop a Communications Management Plan**
 - Identify all information requirements for the effective management of the project's communications
 - Decide on the strategy, goals, frequency, format and recipients of the communication activities

[Communication Plan](#)
- 7 Create the Project Work Plan**
 - Break down the work that needs to be done in smaller and more manageable pieces (Work Breakdown)
 - Estimate the effort and cost for each piece of work
 - Establish the detailed budgetary and resource requirements
 - Create a work schedule (identify dependencies, assign resources and dates)

The PM² Project Organisation

Relationship between Strategy-Portfolio-Programme-Project-Operations

PM² Phases, Drivers, Key Artefacts and Activities

Project Drivers

The Project Drivers differ from phase to phase within the PM² project lifecycle. The Project Owner (PO) is the main driver during the initiation of the project and the Project Manager (PM) drives the planning phase.

The Project Core Team (PCT) drives the execution of the project plan and the creation of the project deliverables while the Project Stakeholders are designated as the main driver of the closing phase.

Project Phases	Phase Gates / Approvals
Initiating Define initial scope, create the Business Case and Project Charter.	Ready for Planning
Planning Elaborate scope, create the PM Plans and assign the Project Core Team.	Ready for Executing
Executing Execute the plan, manage communications and create the project deliverables.	Ready for Closing
Closing Transfer product ownership and report on the project's performance (Project-End Report).	
Monitor & Control Monitor project variables, measure progress, manage changes and identify actions to address risks and issues.	

Phase Inputs and Outputs	Phase Inputs	Phase Outputs
Project Initiation Request	Business Case	Project Charter
Project Charter	Project Handbook	Project Handbook & Project Work Plan
Project Work Plan	Project Work Plan	Project Deliverables
Project Status Reports	Project Deliverables	Project-End Report
Project Deliverables	Project Deliverables	Project-End Report
Project-End Report	Project-End Report	Project-End Report

INITIATING

ACTIVITIES

- Document the idea/need (and their needs)
- Create a business justification for the project
- Define the project scope and organisation

ARTEFACTS

- Project Initiation Request
- Business Case
- Project Charter
- Project Logs (setup)

PLANNING

ACTIVITIES

- Organise a Kick-off Meeting
- Tailor the PM² process (and their needs)
- Assign Roles & Responsibilities
- Elaborate project scope
- Develop work breakdown & project schedule
- Develop Project Plans
- Distribute plans to stakeholders

ARTEFACTS

- Planning Kick-off/MoM
- Project Stakeholder Matrix
- Project Handbook
 - Roles & responsibilities
 - Management plans
 - Team Charter
- Project Work Plan
- Outsourcing Plan
- Deliverables Acceptance Plan
- Transition Plan
- Business Implementation Plan

EXECUTING

ACTIVITIES

- Organise a Kick-off Meeting
- Coordinate project execution
- Conduct Meetings
- Assure quality
- Create project reports
- Distribute information
- Ensure deliverables acceptance

ARTEFACTS

- Executing Kick-off Agenda/MoM
- Meeting Agendas/MoMs
- Change Requests
- Quality Review Report
- Project Status Report
- Project Progress Report
- Deliverables Acceptance Note

CLOSING

ACTIVITIES

- Organise a Project-End Review Meeting
- Capture lessons learned and post-project recommendations
- Get final project acceptance
- Release project resources
- Archive project information
- Close the project

ARTEFACTS

- Project-End Review Agenda/MoM
- Project-End Report
 - Lessons Learned
 - Best Practices
 - Post-Project Recommendations
- Project Acceptance Note

MONITOR & CONTROL

ACTIVITIES

- Monitor Project Performance
- Control Schedule
- Control Cost
- Manage Stakeholders
- Manage Requirements
- Manage Project Change
- Manage Risks

ARTEFACTS

- Monitor Project Performance
- Control Schedule
- Control Cost
- Manage Stakeholders
- Manage Requirements
- Manage Project Change
- Manage Risks

MONITOR & CONTROL

Regularly updated

- Risk Log
- Issue Log
- Decision Log
- Change Log
- Project Work Plan
- Requirements Document

Checklists

- Phase-exit Review checklist
- Quality Review checklist
- Deliverable Acceptance checklist
- Transition checklist
- Business Implementation checklist
- Stakeholder checklist
