

Payment System	
Summary	
ID	BR07
Initiative	BRIS
Short description	<p>Electronic on-line system, available from the e-Justice Portal that is part of the BRIS Platform. Currently under analysis for its organisational and technical development.</p> <p>It will allow the cross-border payment to Business Registries of the particulars and documents on companies and branches that the user searches and retrieves across Europe and that may be served by several Base Registries located in different Member States.</p> <p>It envisions a highly friendly interface that will allow for paying only once, and in one single currency, to all the Base Registries where the user gets data from.</p> <p>The systems will be composed of different parts: one of them is the e-Justice Portal from where the user launches his/her search and checks out the documents and particulars of his/her interests (basket); The rest of the transaction will be subcontracted by the European Commission to a Payment Service Provider whose mission is (i) to collect the money paid by the user; (ii) to signal to the BRIS Central Platform (ECP) that the Business Registries can start delivering the data; (iii) to reimburse each Business Registry with the corresponding part of the money paid by the user.</p> <p>The data for which the user has paid is delivered by the Business Registries to the ECP. The user will receive an e-mail with the links to the data (i.e. documents). The ECP will store this data for a short period of time (initially 5 days). After that period the user will not be able to retrieve it again as the data will be eliminated from the ECP.</p>
