

D3

Dive in: activating the "digital" mindset

Thematic Presentation

Present a movie or an inspiring powerpoint about Smart Cities or other trend.in-action which may reveal the overlapping and interlacing relation between the fields of spatial data and digital transformation of public services

TIMEFRAME

10 – 20 minutes

GROUP SIZE

5 - 25

FACILITATION LVL.

●○○

COMFORT ZONE

●○○

Use it to...

- Start unveiling the opportunity space where spatial data and digital services meet for the public's good

MATERIALS AND OTHER REQUIREMENTS

- Presentation

Thematic Presentation

Walkthrough

1. Preparation

You should select a suitable theme for your audience and get or prepare an inspiring presentation or movie which covers it.

2. Introducing the activity

Before starting the presentation, you may briefly introduce it the following way: "Now that we surfaced the core concepts around spatial data, it will be a good moment to see how it is being currently applied to shape public services in the context of growing digitalisation of everything. So, I invite you all to see this presentation on <theme>."

3. Recap

Make a short recap of the presentation key-points and ask the group to share their thoughts. Instead of group sharing, you may want to move directly to a "How-Might-We" activity (see activity D4)

4. Setup

Play the movie in silence or run the presentation according to your facilitation notes.

5. Debrief

Make a short recap of the presentation key-points and ask the group to share their thoughts, highlighting issues such as:

- *What did you find to be easier? And more difficult? Why?*
- *What surprised you the most and why?*
- *What learnings can you take from this experience?*
