**Highlights**

**Political Communications**
The implementation of two new government initiatives is foreseen for 2022, with a view to establishing a national framework for basic data in public administration and a digital infrastructure for information exchange.

**Legislation**
No recent major update has been identified in this field to date.

**Governance**
The Agency for Digital Government (DIGG) received new specific funds from the Swedish government within the budget bill for 2021 and 2022, for the growth of a common public sector digital infrastructure.

**Infrastructure**
Since June 2021, the JobTech Development platform brings together actors operating within or in relation to the Swedish labour market to develop a data infrastructure for skill-supply and lifelong learning. Since March 2022, it is possible to connect to the infrastructure for secure digital communication.
