

SPAIN

2023 Digital Public Administration factsheets

Annex 1. Selection of Topics: 2023

INTEROPERABILITY & INTEROPERABLE PUBLIC SERVICES

Cross-border interoperability

The Spanish Ministry of Economic Affairs and Digital Transformation and the Portuguese Ministry of Economy and Digital Transition have signed a Memorandum of Understanding for an Iberian alliance in the digital field, to cooperate in areas such as the digital connectivity hub, 5G, the creation of clouds, Artificial Intelligence, digital infrastructures or digital entrepreneurship.

INNOVATIVE USE OF TECHNOLOGIES BY THE PUBLIC SECTOR

Artificial Intelligence (AI)

In December 2020, the Spanish government presented the [Artificial Intelligence National Strategy](#) for the period of 2021–2023. The objective of the strategy is to set a level-playing field for businesses and citizens that guarantees security and privacy. The AI Strategy is part of the Recovery, Transformation and Resilience Plan for the Spanish economy, offering a framework for the development of AI in the country which aims to improve market competitiveness and growth.

GovTech

One of the initiatives incorporated into the draft Govtech strategy is the use of plain communication in the administration. A decalogue of commitments has recently been presented on promoting the use of clear language on public administration website. The purpose of the decalogue to put plain language strategies and activities into practice in order to achieve a simple and efficient writing style on the digital channel, that helps people easily understand how carry out an administrative procedure o process.

DATA SHARING

Data spaces and Smart Data Platforms

The Valencia City Council proposes the management of public space, urban mobility for specific groups. This initiative aims, through the use of sensors installed on public roads, to inform stakeholders about the real-time status of each free-occupied space, and from the municipal level to have an analysis tool that will allow to identify improvements in the global mobility, inappropriate use of public space, facilitating their activity to these groups.

Data exchanges with and within public administrations

The [Data Intermediation Platform](#) (DIP) is the main service of the central government inter-administrative infrastructure to honour the Once-Only principle. The Data Intermediation Platform is responsible for performing critical functions such as managing the transferees and requesters actions, deleting citizens' personal information obtained during data exchanges once they are completed, ensuring data confidentiality and integrity, etc.
