Digital Public Administration

**Political Communications**

In the first quarter of 2019, Romania developed a policy aimed at improving and promoting the availability of eCommerce solutions across the country in line with the European Commission guidelines.

**Legislation**

The emergency ordinance no. 62/2019 changes and adds new features to the emergency ordinance no. 34/2008 regarding the organisation and function of the national system for emergency calls and the emergency ordinance no. 111/2011 on electronic communications.

**Governance**

The responsibility for Romania’s eGovernment strategy/policy lies within the Authority for the Digitalisation of Romania (ADR). The same body is also responsible for interoperability activities.

**Infrastructure**

Romania developed a central eProcurement platform where all Romanian contracting authorities are required to publish their notices within the framework of public procurement procedures, and all businesses aiming at supplying products or services to a public authority have to access the platform.
