STARTER GUIDE of
Interoperability Maturity Tools (IMTs)

interoperable
europe

IMTs are online self-assessment tools which allow public administrations to **evaluate the interoperability maturity of their digital public services** or to **check interoperability requirements** for the design of new digital public services, which are *interoperable by design*.

Each of the IMTs provide you with

✓ **A free of charge online questionnaire** which can be easily completed in 30 minutes

✓ **An Interoperability maturity score** indicating where your service stands today considering key interoperability aspects – from ad hoc (level 1) to seamless interoperability (level 5)

✓ **A set of recommendations** for improving your digital public service, based on interoperability standards and good practices

✓ **A report of your assessment** to support your investment decisions

✓ A **statement of conformance** with the European Interoperability Framework (**EIF)** principles

IMTs

IMTs assess interoperability maturity with:
- **IMAPS** for the behavioural
- **SIQAT** for the structural
- **GIQAT** for the governance

Users

Policy-makers
Public Service Owners
IT Solution Portfolio Managers
IT Architects
Public Procurement Officers

Deep-dive

Specialised versions of IMAPS can be used to assess the interoperability of a digital public service with focus on:

- Legal aspects **LIMAPS**
- Organisational aspects **OIMAPS**
- Semantic aspects **SIMAPS**
- Technical aspects **TIMAPS**

Start your own assessment

01 **Familiarise with the IMTS, using the user guides** to discover key features and preview of the questionnaires.

02 **Select your digital public service** and clearly define and scope it.

03 **Start with the questionnaires** (**IMAPS**, **SIQAT**, **GIQAT**) and submit your response.

04 **Open your e-mail** for the final results & recommendations. The IMTs team supports you on the uptake.

Benefits in practice

Discover the experience of other users in **Belgium, Czech Republic, Slovenia** and **Valencia**.

200+ Digital public services assessed – IMTs can be used for any type of digital public service from various sectors (health, justice, taxation, social care, etc.)

EU27+ Public administrations in the EU and beyond used IMTs, at local, regional, national and international administrative levels.
