Interoperable Europe Academy

Advancing the digital skills of public servants across Europe

Background

Interoperable Europe Academy (IOPEU Academy) was founded in 2019 under the [ISA2 programme](#) with the goal to make public administrations as interconnected as possible using educational approaches. At its current state, it is a key factor of the European Commission's [Interoperable Europe initiative](#).

Contribution to the interoperability of the public sector

IOPEU Academy offers various learning activities which mainly aim to help public servants boost their advanced digital skills in order to defy borders and make public administrations interoperable across Europe.

More specifically, the IOPEU Academy offers:

- self-paced, online courses that are available 24/7
- seasonal schools
- learning materials on Joinup
- a wide community that encourages knowledge exchange

The above learning activities target mostly public servants, and people involved in the digital transformation of public administrations. Nevertheless, they can be also followed by young professionals, students, citizens and private sector employees interested in the field, since there is a wide variety when it comes to their difficulty and prerequisites.

Where to find IOP EU Academy's material

- All courses are related to the subject of interoperability and are hosted on the EU Academy platform. They can be found by simply searching with the tag 'interoperability'.
 - As a solution on the Joinup page of [Digital Skills in the Public Sector](#), the Academy gathers different resources oriented to broaden advanced digital skills and to promote interoperability. That solution includes news, events, community discussions, and a repository of community members, among others.

Main achievements

- Release of over 20 online courses
- Development of [learner profiles and different learning paths](#)
- Publication of the '[Study on the development of a European framework for interoperability skills and competences in the public sector \(EIFISC\)](#)'

Upcoming goals

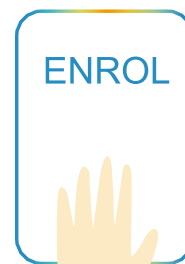

- Develop the IOPEU Academy curriculum in accordance with the latest needs in the relevant fields
 - Support multilingualism and reuse by translating its courses into all the European languages
 - Reuse of courses
 - Increase the community around advanced digital skills & encourage exchange
 - Share instructions for the reuse and creation of learning materials and provide support to users.

Enrol in our courses and join our community so that you are always up to date not only with us but also with the latest trends and needs in the area of interoperability!
