

LEOS IN SPAIN

Carlos Fernández Cubero - Ministry of the
Presidency, Relations with the Parliament and
Democratic Memory - Spain

Status of LEOS in Spain

Ongoing trials in several Ministries:

- Great acceptance. Solved problems arisen related to:
 - Slow operations with commercial Content Managers using CMIS.

THKS to EC team for their help

GET HELP

- Distributed drafting of new norms → distributed role management.
- New templates. New roles ...

Boosting digital transformation

- LEOS as part of a E2E scenario using structured formats.
- Automatic generation of 'Golden Border'.

Collaboration on developing a common feature: Amending acts (I)

Organization

- Initial technical study conducted by EC team.
- Weekly meetings. Agile methodology.
- Branch in EC Bitbucket code repository.
- Agreed allocation of tasks evolved to distribution based on skills.

Main issues

- Different urgencies and constraints.

Collaboration on developing a common feature: Amending acts (II)

Learned lessons

- AKN4EU extremely important.
- Quite difficult to completely align code in both sides.
- Important to reinforce mechanisms to configure LEOS → structure and CKEditor profiles.
- Clarify deadlines and/or priorities at the beginning of the project. Be prepared for changes on both sides.

... and a lot about LEOS, Akoma Ntoso and open source libraries

...

Collaboration on developing a common feature: Amending acts (III)

And now ...

- Eager to contribute again.
- One way is joint development, but there are other ways:
 - Sharing of customized CKEditor profiles, templates and structure files.
 - Experiences of use cases integrating with external services.
 -

Thks!
