The Netherlands Cybersecurity Strategy 2022-2028 was published in October 2022. The strategy describes the government's vision on the security of the digital society and the role played by public authorities, businesses and the public within it. It is accompanied by an action plan that sets out specific actions aimed at making the Netherlands more secure.	The Digital Government Law was passed by the Senate on 21 March 2023 and will take effect in phases from 1 July 2023. The main objective of the draft law is to ensure safe access of Dutch citizens and businesses to (para-) governmental agencies. The law also sets minimum mandatory standards.	TechLeap.nl helps quantify and accelerate the tech ecosystem of the Netherlands. It is making the Netherlands home for tomorrow's leaders in tech. One of the chief instruments it offers is the Finder, which you can use to explore the ecosystem and find start-ups, scale-ups, investors, corporates, accelerators, service providers, and more besides.	No recent changes in governance have been reported to date.
