Latest Initiatives

Political Communications

In January 2023, Digg, the Swedish Agency for Digital government, presented a long-term plan for the development of a [digital infrastructure for information exchange](#), together with details concerning its funding. All information can be found in the [final report](#) published in the same month.

Legislations

Following the changes in the national Municipality Act, starting from 1 July 2022 municipalities and regions have the right to delegate decision-making to an automated function in cases where the national Administrative Procedure Act is fully applicable and where automated decision making does not conflict with other legislation.

Infrastructures

The [verksamst.se portal](#) serves as a comprehensive single-entry point for entrepreneurs and enterprises to access relevant and official eServices and information from many public authorities and municipalities. The portal is managed in collaboration between the authorities that provide services to entrepreneurs. A new platform will be operating by the end of 2023 and will open opportunities for further development of the verksamst.se portal with more, better and easier information and eServices for entrepreneurs and enterprises.

Governance

In January 2023, the Ministry of Infrastructure was abolished and its competencies were transferred to the Ministry of Rural Affairs and Infrastructure, the Ministry of Climate and Enterprise, and the [Ministry of Finance](#). The latter is now responsible for matters relating to digital policy. The Minister specifically responsible for digital policy is Mr. Erik Slottner, Minister for Public Administration.
