eGovernment in France
Visit the e-Government factsheets online on Joinup.eu

Joinup is a collaborative platform created by the European Commission under the ISA programme. ISA supports the modernization of Public administrations in Europe through the development of interoperable services, frameworks and tools. Joinup provides numerous services around 3 main functionalities:
1. An observatory on interoperability, e-government, e-inclusion and e-health
2. A collaborative platform of open communities
3. A repository of interoperability solutions

This document is meant to present an overview of the eGovernment status in this country and not to be exhaustive in its references and analysis. Even though every possible care has been taken by the authors to refer to and use valid data from authentic sources, the European Commission does not guarantee the accuracy of the included information, nor does it accept any responsibility for any use thereof.

## Country Profile

### Basic data and indicators

#### Basic Data

- **Population (1 000):** 66,352,469 inhabitants (2015)
- **GDP at market prices:** 2,132,449 million Euros (2014)
- **GDP per inhabitant in PPS (purchasing Power Standards EU 28=100):** 107 (2014)
- **GDP growth rate:** 0.2% (2014)
- **Inflation rate:** 0.1% (2015)
- **Unemployment rate:** 10.3% (2014)
- **General government gross debt (Percentage of GDP):** 95.6% (2014)
- **General government deficit/surplus (Percentage of GDP):** -3.9% (2014)
- **Area:** 543,956 km²
- **Capital city:** Paris
- **Official EU language:** French
- **Currency:** EUR

Political Structure

The political system of the Fifth French Republic combines the characteristics of a **parliamentary democracy** with a strong executive power and is often defined as a **semi-presidential system**.

Legislative power lies with a **bicameral parliament** comprising a Lower House (**National Assembly**) and an Upper House (**Senate**). The National Assembly consists of 577 members, elected for five years by direct universal suffrage, with a two-round majority voting system. The 348 members of the Senate are elected by indirect universal suffrage (i.e. by local councillors) for a period of nine years, one-third of which is renewed every three years.

The Head of State is the **President of the Republic**, elected for five years by direct universal suffrage. According to the terms of the Constitution, the President undertakes important duties and responsibilities in the fields of foreign and defence policies, as well as in domestic policy. Constitutionally, the locus of the executive power is the Council of Ministers, which is chaired by the President. The Government is headed by the **Prime Minister** who is appointed and can be dismissed by the President of the Republic. Ministers are similarly appointed and dismissed by the President on the Prime Minister’s proposal. The Government has to obtain the majority in Parliament. The Government also answers to the President, except in case of temporary non-coincidence of the presidential and parliamentary majorities (‘cohabitation’), where the balance of executive power in domestic policy shifts to the Prime Minister.

France is considered a centralised State, even though some powers have been devolved in recent years to the country’s 22 regions, 96 counties (‘départements’) and more than 36,500 municipalities.

The **Constitution** of the Fifth French Republic was adopted by referendum on 28 September 1958 and amended several times since then. The most significant amendments were adopted in 1962 (election of the President of the Republic by direct universal suffrage), in 2000 (reduction of the presidential mandate from seven to five years), in 2005 (including modifications of title XV dedicated to the European Union), in 2008 (modernisation of the Institutions of the 5th Republic) and in 2015 (**reform of the territorial organisation**) which will take place in 2016.

France was one of the founding members of the European Economic Community in 1957.

**Head of State:** President **François Hollande** (since May 2012).

**Head of Government:** Prime Minister **Manuel Valls** (since March 2014).
Information Society Indicators

Generic Indicators

The following graphs present data for the latest Generic Information Society Indicators for France compared to the EU average. Statistical indicators in this section reflect those of Eurostat at the time the Edition is being prepared.

eGovernment State of Play

The graph below is the result of the latest eGovernment Benchmark\(^1\) study, which monitors the development of eGovernment in Europe, based on specific indicators. These indicators are clustered within four main top-level benchmarks:

- **User Centricity** – indicates to what extent (information about) a service is provided online and how this is perceived.
- **Transparent Government** – indicates to what extent governments are transparent regarding: i) their own responsibilities and performance, ii) the process of service delivery and iii) personal data involved.
- **Cross Border Mobility** – indicates to what extent EU citizens can use online services in another country.
- **Key Enablers** – indicates the extent to which 5 technical pre-conditions are available online. There are: Electronic Identification (eID), Electronic documents (eDocuments), Authentic Sources, Electronic Safe (eSafe), and Single Sign On (SSO).

These top-level benchmarks are measured using a life-events (e.g. mystery shopping) approach. The following life-events were used for measuring the eGovernment Benchmark top-level indicators: Business start-up and early trading operations, Losing and Finding a Job, Studying, Regular business operations, Moving, Owning and driving a car, and Starting a small claims procedure. The figure below presents the development of eGovernment in France compared to the EU average score.

Recent News

France connect service will be opened in the first part of 2016.

December 2015

At the end of December 2015, after his first year in a newly opened position as established by the decree of 16 September 2014, the Chief Data Officer (Administrateur Général des Données (AGD)) Henri Verdier, submitted a first annual report on data governance to the Prime Minister. The report includes information on the inventory, governance, production, circulation, and the use of data by the administrations, as well as it presents a series of recommendations for the state. This first report, as based on a year of investigations, exchanges and experiments with many public officials and administrators, is intended to lay framework for analysis, to identify future potentials and possibilities, as well as to identify structural and cultural barriers to the release of the data held by governments. Furthermore, it also highlights the limits of the capacity of the state and points out at the increased use of private providers in the management of information systems. Full report is available in French language on the portal of the Government Modernisation. As established by the same decree, the Chief data Officer shall present a public report on the inventory, governance, production, circulation, and the use of data by the administrations to the Prime Minister on an annual basis.

November 2015

At the end of November 2015, the inter-ministerial network is deploying over 8400 websites. Ministries of agricultural, health and work are fully implemented. Over 1600 other websites will be finished for the first quarter of 2016.

September 2015

On 24th September 2015, the nomination of Henri Verdier for the new CIO of the French State was officially announced as replacing Jacques Marzin. This nomination is related to a global overhaul of the Secretariat général pour la modernisation de l’action publique (SGMAP) that is in charge of the modernisation of the French state. As part of this reorganisation, the former the state IT shop DISIC is being merged with the governmental entity in charge of Open Data policy in France Etalab that Henri Verdier was previously head of.

The "Open Fisca" software allows citizens to anticipate their tax. Researcher and administration could use it for simulate tax reform. It is developed and continuously improved by Etalab.
The newly-formed Direction interministérielle du numérique et du système d’information et de communication (DINSIC) will also be in charge of the state’s inter-ministerial network (RIE – Réseau interministériel de l’état) and will also have a “digital services incubator” function, and involvement in key IT projects, including those related to HR and payroll, and the implementation of the Open Data strategy in France. The implementation of inter-ministerial network of the state is committed to 13000 websites. The ministries concerned are those of agriculture, ecology, health, culture, work as well as the ministry of the interior and the ministry of economics and finance.

July 2015

France has published its first Open Government National Action Plan 2015 - 2017 that details its commitment to the promotion of transparent and collaborative public action under 26 Open Government commitments. Furthermore, it symbolises France’s involvement in the Open Government Partnership (OGP) that is an international Open Government organisation oriented at the adoption of open and transparent processes in the public administrations. As decided in April 2015, France is going to chair the OGP from October 2016 to October 2017.

Secondly, in July 2015, French government has published free software procurement templates to be used by procurement officers when requesting free software-based ICT solutions at the 16TH Rencontres Mondiales du Logiciel Libre conference in Beauvais (France).

The French government has launched two law projects related to the opening of public data. One is “gratuité”, supported by Clotilde Valter the French Secretary of State in charge of simplification and reform of the state. The second one is “Numérique” supported by Axelle Lemaire the French Secretary of State in charge of digitalization.

June 2015

In June 2015, a platform for French civil servants working on free software Addulact unveiled a solution to access France’s e-ID services i-CLEFS with key objective to help municipalities in the provision of eGovernment services. By inclusion of a few lines of HTML in the municipalities’ website, a municipality can provide citizens with an access to the France Connect’s eGovernment services. The i-CLEF software is made available under the GNU Affero General Public License (AGPL).

April 2015

On April 24th, France’s application for Lead Chair of the Open Government Partnership from October 2016 to October 2017 has been approved after the OGP Steering Committee meeting in Mexico. It is perceived as an opportunity for France to forge new partnerships with a community of innovators from numerous governments, as well as with a vibrant civil society.

Secondly, on April 29th, the ‘Référentiel Général d’Accessibilité pour les Administrations’ (RGAA) guidelines were officially approved by government decree. These rules on the accessibility of French public administration’s websites have been updated by the rule on the use of modern web technologies (HTML5) and come with improved tools for testing website accessibility. The website for guidelines has also been adjusted allowing for easier access to the documentation. In addition, this included the RGI.
February 2015

France created by the government decree of 3 February its Digital Agency (Agence du numérique). The Digital Agency has been given the responsibility for managing and implementing France’s high speed Internet plans (Mission Très Haut Débit). A second responsibility is the management and implementation of “French Tech”, an network of stakeholders such as entrepreneurs, investors and government agencies that aims to increase the number of innovative ICT companies and digital businesses in the country. A third task is to promote the dissemination of digital tools, and increase citizens’ digital competence (DUI).

Secondly, on 16th February 2015 French Parliament launched its first experimental public online consultation to as citizens what they think about the proposed law. General public was invited to submit their ideas and comments on the eleven articles of the proposed law, and was also able to comment on the opinion of others. Consequently their opinions shall be taken into account by the French parliament via an MP responsible for the reporting (‘rapporteur’).

Thirdly, the French Members of Parliament voted in favour of the article 19 of the draft Loi Macron that shall ‘allow the openness and the free sharing of The Registre national du commerce en des sociétés (RNCS – National Registry of Commerce and Companies) information’ in order to ‘improve the dissemination and reuse’ of the legal data of companies centralised in the RNCS. As a result, the information about French companies that are collected and centralised by the InfoGreffe are freely available since February 2015.

January 2015

The Secretary of State for State Reform and Simplification, Thierry Mandon, inaugurated on 27 January the RIE (Inter-ministerial Network of the State), a shared network that will connect by 2017 all the administration sites. The mutualisation allows a better network performance, better security, de-compartmentalisation of the flow of information between ministries, and a reduction in costs.

A circular from the Prime Minister committed the various Ministries to optimize IT spending. Under the coordination of the DISIC (Inter-ministerial Directorate for Information and Communication Systems), an optimisation plan will be developed for April 2015, steered the right tools, updated annually. It will generate investment capacities for inter-ministerial projects.

Secondly, in January 2015 Environment and Energy Management ADEME (Agence de l’Environnement et de la maîtrise de l’énergie) deployed the open source file sharing solution Pydio (Put Your Data in Orbit – formerly known as Ajaxplorer) for its one thousand employees. The application was implemented in March 2013 with the purpose to provide an internal reliable and secure solution for proprietary online file synchronization solution. The solutions is used by the employees to sharing files with their internal teams and external partners.

November 2014

The DISIC (Inter-ministerial Directorate for Information and Communication Systems) publishes the “Government as a Platform” strategy to change the way digital public services are designed.

The first edition of the digital dashboard is published and available online.
October 2014

France becomes a member of the Steering Committee of the Open Government Partnership (2 years mandate). As announced by the web portal of the central government, For Thierry Mandon, France’s election to the Steering Committee for the Open Government Partnership is “another step to the digital transformation of the State”.

September 2014

France created by the decree of 16 September 2014, the function of Chief Data Officer (Administrateur Général des Données). This is the first time in Europe that such a function is created at national level. Under the authority of the Prime Minister within the Secretariat General for Government Modernisation (Secrétariat Général pour la Modernisation de l’Action Publique, SGMAP), this new assignment is entrusted to Henri Verdier, director of Etalab, the department of SGMAP responsible for opening public data.

August 2014

A decree of August 1, 2014 entrusts the responsibility of the State information system to the Prime Minister. The State information system as a whole is, from now on, under the governance of the Prime Minister, who may delegate part of its management to each minister. This change accelerates the transition to coherent governance and to the mutualisation of all infrastructures, including networks, services and software.

April 2014

France becomes 64th country to join the Open Government Partnership.

December 2013

By decision of CIMAC 18 December 2013, the Prime Minister appointed the SGMAP, and more specifically, the special interdepartmental management of information and communication systems task force (DISIC). Objective: to provide within three months, in conjunction with the general secretaries of ministries and DSI all levers to fundamentally transform the public administration information systems. This for the benefit of innovation in the public service and the benefit of the provider and the user, in the context of demanding economies. A major project which includes nearly 150 experts in information systems and digital matters. A report was produced, identifying many levers of transformation. This report is now a guide to the development of the state information system.

A new version of the data.gouv.fr portal was launched which adds a social and collaborative dimension by opening up to citizens contributions. It now also allows civil society organizations to enhance, modify and interpret data with a view to co-produce information of general interest.

February 2013

In 28 February 2013 the French government adopted a strategy to cover the entire territory with broadband by 2020 (le plan France Très Haut Débit – THD).
2012

The French government established the Secretariat General for Government Modernisation (Secrétariat général pour la modernisation de l'action publique - SGMAP, in French) on 30 October 2012, which confirmed the government's intention to continue its open data strategy in order to facilitate the broader reuse of public information produced by the public administration. The SGMAP regroups the departments responsible for the modernisation policy: the inter-ministerial directorate for the Government Modernisation (which replaced the DGME), the inter-ministerial directorate of Information and Communication Systems (DISIC) and Etalab in charge of the dissemination of the public datas.

2011

France launched its open data portal, data.gouv.fr, in December 2011, allowing public services to publish their own data.

Etalab is a government agency under the authority of the Prime Minister, set up by a decree issued in 2011. Etalab was commissioned by the Prime Minister to design the data.gouv.fr portal and to coordinate the reuse of public data. Etalab is now part of SGMAP (Secrétariat général pour la modernisation de l'action publique - General secretariat for the modernization of public action).

As announced in the LibreOffice Conference held in Paris on 12-15 October 2011, the Government of the Ile-de-France region teams up with The Document Foundation to provide a 'Software as a service' (SaaS) version of LibreOffice - the Foundation's free office suite - to a wide range of upper secondary education actors. According to the regional government, it is foreseen that from the beginning of school year 2012 approximately 1 million users (school pupils, their parents, teachers and administrative staff) will have the opportunity to use this SaaS version named 'LooL' (Libre Office On Line). This derived version of Open Office combines all the functions of the free software suite with an HTML 5 interface that is compatible with almost all modern terminals.

The region will host LooL within its dedicated cloud environment (named Marguerite) with a specific plug-in developed by a free software provider, and users will be able to store their documents in their own spaces within this cloud. Access to LooL will be through 'Lilie', the open source Digital Work Environment (Environnement Numérique de Travail - ENT) of the region's secondary schools.

In a ruling of 30 September 2011, the Council of State, France's highest administrative court, clarifies the right of contracting authorities to require suppliers to use specific open source software in the context of public procurement.

In the case in point, a regional authority had launched a call for tenders for the "awarding of a service provision contract for the implementation, exploitation, maintenance and hosting of a service platform for an open source digital working environment - named Lilie - aimed at secondary schools". Two companies referred the case to the urgent applications judge (Juge des référés), who quashed the procedure on the basis that there was a breach of both the obligations of publicity and competitive tendering (Article 6 of the Public Procurement Codes prohibits referring to brands in the technical specifications of contracting authorities). The judges of the Council of State do not share this opinion, saying that the contract in question did not consist of providing software but of providing adaptation, installation and maintenance services for the Lilie software. In other words, the judges decided that it was permissible for the technical specifications to mention the Lilie software in this specific case.

On 14 September 2011, Valérie Pécresse, French Minister for the Budget, Public Accounts and Administrative Reform and government spokesperson, launches Adm'innov, an online extranet repository for collecting the proposals of civil servants and hosting staff discussions on ways to improve the provision of government services. The portal launch
marked the closing of the one-day 'Carrefour Adm'innov' forum on innovative administration which was organised by the Directorate-General for State Modernisation (Direction Générale de la Modernisation de l'Etat - DGME).

Adm'innov enables State civil servants to contribute directly to service improvement by sharing their ideas for simplifying and enhancing service provision with citizens, businesses, local authorities and associations. The first call to collect civil servant contributions runs until 30 November 2011. The best proposals will be further developed and incorporated into the '100 simplifications' programme, with a view to its implementation at national level.

The country-wide deployment of the electronic notice of infraction service provided for French civilian and military police forces as well as electronic ticketing for local authorities will continue until June 2012. The National Agency for Automatic Processing of Infractions (Agence Nationale de Traitement Automatisé des Infractions - ANTAI) is at the origin of this project involving the complete dematerialisation of the petty offence system. An electronic notice of infraction is set to gradually replace the fine payment stamp for road safety offences, including ticket notices, registration and collection of fines.

This new system offers a number of advantages for citizens and services: electronic data recording prevents transcription errors and the information notice reduces the risk of loss or theft of the fine payment stamp and any possible surcharges. New payment methods are currently also available, especially via the Internet, by phone or online at tobacconists.

On 31 May 2011, the Minister responsible for Digital Economy, Eric Besson, announces that the establishment of the IDéNum consortium and the submission of the first proposals for the single multi-service digital identity certificate would occur by the end of 2011. In February 2010, the government launched IDéNum, a programme for the creation of highly secure single electronic identity that would replace the numerous online identification means required for using web services.

Minister Besson pointed out that the establishment of IDéNum could promote broader access to a wide range of eGovernment services, and thus further simplify administrative procedures for citizens. The process of setting up IDéNum is the result of broad consultation with all the actors that provide online services. Minister Besson further informed that four major private companies expressed their readiness to make, with the assistance of the government, the first proposals for IDéNum within the next months. Therefore, a preparatory study intended to define the modalities for the constitution of the consortium and to determine the business model launched with these four companies.

DISIC, placed under the authority of the Prime Minister and connected to the Secretary General for the Government, is established by Decree No 2011-193, thus replacing the National Steering Committee for Information Systems (CPNSI). The DISIC project, which was led for over eighteen months by the Directorate-General for State Modernisation (Direction Générale de la Modernisation de l'Etat - DGME), allowed the government to deploy an enhanced IT governance, but also a greater consistency in IT choices for the administration, and a larger representation of its technological positions internationally.

At the end of January 2011, the City of Paris launches a portal, opendata.paris.fr, to provide citizens with access to local government data. The data is available under an adapted version of the ODbl license, which foresees that commercial re-users can either share their resulting work under the same conditions, or buy a non-exclusive license.

The launch of the 'opendata.paris.fr' site marks the end of a first step in the release of the City's data, but it is also the start of an initiative: many datasets will be added to the catalogue over the coming months, when the contributions of the various municipal services are made. This release of public data fits into an overall policy of openness
followed by the City of Paris since 2008, by which the whole city becomes a testing ground; where people become 'co-designers' in the developments of their city.

2001 - 2010

Due to extensive length of the document, the eGovernment History has been shortened in the latest version of the eGovernment factsheet. Nevertheless, the information for years 2001 – 2010 can be fully retrieved here.
**eGovernment Strategy**

Main strategic objectives and principles

---

**Modernisation of the public action**

At a time when Member States are facing increasing pressures on public budgets, the challenge of ensuring high-quality public services requires technological and organisational innovations (modernisation) to boost efficiency. The MAP (Modernisation of the Public Action) provides a new instrument to improve public policies at the service of citizens.

**Government Roadmap for the Digital Economy**

Following a workshop on the digital economy organised on 28 February 2013, the government presented its Roadmap for the Digital Economy.

This strategy revolves around three pillars, which are to 'Provide opportunities for youth', 'Reinforce competiveness', and 'Promote our values in society'.

---

**Provide opportunities for Youth**

Four objectives have been defined under this pillar:

- **Using digital tools to rethink education in schools**, as to ensure that all students leaving school are familiar with digital tools, have followed courses in information and media, and are aware of the historical, cultural, artistic, economic and social challenges brought about by the information society.
- **Creating more digitally accessible universities**, as to ensure that by 2017, distance learning programmes, and diplomas, can be obtained in all fields where this is possible, and that 20% of educational programmes be available through digital means.
- **Promoting ICT related jobs**, as to increase by at least 3 000 per year the number of graduates which obtain ICT related degrees.
- **Reinforce awareness raising campaigns**.

**Reinforce competiveness**

Four objectives have been defined under this pillar:

- **Encourage the development of global digital companies**;
- **Encourage research and innovation**;
- **Guarantee digital take-up for the entire economy**;
- **Develop 21st century infrastructure**.

**Promote our values in society**

Six objectives have been defined under this pillar:

- **Encourage the use digital tools to tackle exclusion**;
- **Protect our sovereignty and establish a trustful environment for citizens**;
- **Define a new digital pact to promote cultural activities**;
- **Modernise public policy through the use of digital tools and resources**;
Promote the use of digital means in the health sector;
Respond to cyberspace related challenges.

Inter-ministerial network of the State (RIE)

RIE is a key project in the modernisation of the State’s information system of public action in France. It aims to pool the existing networks - and replace them - with a new unified infrastructure in order to connect all governmental sites, central and decentralised administrations in France with a target of 17,000 connected sites by 2017. The key aims of RIE are the following:

- Simplification and streamlining of the exchange of information between ministries and departmental entities, and optimisation of services for agents and users;
- Securitisation of the information system of the State and enhancements in the global IT security as the number of cyber-attacks grows; and
- Optimisation of the infrastructure to provide unified service catalogues and reduce costs through mutualisation.

Previous eGovernment Strategies

Development Plan for the Digital Economy—'Digital France 2012'

The Development Plan for the Digital Economy by 2012 was unveiled in October 2008 by the Secretary of State to the Prime Minister, with responsibility for Forward Planning, the Assessment of Public Policies and the Development of the Digital Economy.

This Development Plan formulates over 150 actions which are structured around four core priorities: enabling all citizens to access all digital networks and services; developing the production and supply of digital content; increasing and diversifying the use of digital services by companies, Public Administrations and citizens; and modernising the governance of the Digital Economy. The plan also focuses on the development and availability of the infrastructure for everyone, over the entire territory, with a set target of 100% access to fixed broadband Internet in the near future. Moreover, the plan sets out actions aimed at deploying the relevant high-speed broadband infrastructure.

Another key element of the plan lies with digital content. The transition to digital TV allows for the sharing of quality frequencies through which new Internet services are made available, thus creating new opportunities for the businesses involved in the provision of such services. The Development Plan furthermore provides for actions intended to promote the use of digital content and services by all citizens and companies.

The enhancement of digital trust stands as another priority aspect of the Development Plan. It therefore provided for the deployment, as of 2009, of an electronic identity card (eID) on the basis of a highly secured eSignature standard. The eID card is meant to facilitate the direct participation of citizens in the public decision-making process (e.g. online consultations and petitions) and, through the appropriate measures, fight cybercrime.

As far as the governance of the Digital Economy is concerned, the plan establishes an inter-ministerial delegation bringing together the respective human and financial means that were dispersed in ten ministries, having the sufficient overview to prepare a global strategy for tackling common challenges. The 'National Delegation for Digital matters' was scheduled on 1 January 2009.
The State Secretary responsible for the Development of the Digital Economy invited the public to express their comments and suggestions on the Plan via the website of 'Digital France 2012'.

Almost three years after the submission of the 'Digital France 2012' plan, President Nicolas Sarkozy created on 27 April 2011, the National Digital Council of foreseen by Action No. 145 of the Plan that would be chaired by Jean-Pierre Charm, creator of the seedling Kasskooye.com.

General Review of Public Policies (RGPP) 2007-2012

In July 2007, the Prime Minister launched the General Review of Public Policies (RGPP) whose purpose is to control and streamline the use of public funds while improving the quality of public policies. This new reform method has been designed to provide foundations for the conception of 'Public Services 2012' aiming to better adapt Public Administration and services to users' needs, reduce public expenses until 2012 and reaffirm the value of the work of public servants.

In June 2010, RGPP entered a new phase, with an initial assessment of the completed measures and the adoption of a new series of measures for the years 2011-2012. In total, more than 300 reforms decisions were made in the framework of the RGPP to date.

Process for the Modernisation of Public Policies

The ‘Council for the Modernisation of Public Policies’ (CMPP) is an organisation chaired by the President of the Republic with participation of all ministers. Its function is to decide on the necessary reforms in several fields of action related to the modernisation of the French State. The Minister for the Budget, Public Accounts and State Reform is the general rapporteur of the Council. Among the Council’s fields of competence are the development of eGovernment, the quality of public information systems and management procedures, legislative simplification and the organisation of the State at local level.

Overviews of 'Public Service 2012' measures

In December 2007, the Council for the Modernisation of Public Policies held its first session and approved hundreds of modernisation measures to be implemented by the various Central Government ministries. At the Council’s second meeting in April 2008, a wider range of measures has been decided upon for the period 2008-2010. The third session of the CMPP took place in June 2008 with the aim to further widen the coverage of the State reform while analysing and complementing the ongoing reforms.

In the context of all the meetings of the CMPP 5 overviews of implementation of the measures planned have taken place in order to assess the percentage to which the measures set have been implemented.

More specifically:

- At the beginning of December 2008, the Minister for the Budget, Public Accounts and State Reform presented a first overview of the implementation of the measures of 'Public Service 2012'. The assessment revealed that 85 % of the implementation of the decided measures were in line with the fixed schedule.
- On 13 May 2009, the Minister presented the second overview of the implementation to the Council of Ministers. According to the report, 95 % of the measures adopted by the President of the Republic and the Government within the framework of the CMPP were currently being implemented.
On 18 February 2010, Éric Woerth, Minister for the Budget, Public Accounts and State Reform presented the third overview of implementation to the Council of Ministers. At the time, according to the presented report, 97% of the measures adopted by the President of the Republic and the Government in the framework of the CMPP were being implemented.

On 30 June 2010, the Minister for the Budget, Public Accounts and State Reform François Baroin, presented the fourth overview of implementation regarding the general revision of public policies and the decisions made by the Council for the Modernisation of Public Policies, chaired by the President of the Republic. Thanks to the mobilisation of all the involved departments 96% of the measures adopted by the President of the Republic and the Government in the framework of the CMPP were being implemented. And corrective action needed to be taken only for 4% of the measures.

In March 2011, during the CMPP’s fifth session, Minister Baroin presented the fifth overview of implementation, more than three years after the launching of the Modernisation of the French State. This overview is an opportunity to reaffirm a method that has proven its effectiveness and presented longevity rare in the history of State Reform. The overview in question was drafted and published with the aim to remind all those involved that this review is an ongoing process, with the implementation of fifty new measures mainly in the area of simplification, audits of operators, intervention and investment costs (especially in information technology and real estate).

The Council has also decided the implementation until 2013, of 150 new measures. These measures are the result of close collaboration with each one of the Ministries during the past year. They will contribute to the improvement of the quality of the offered services but also to the effort of recovery of public accounts. The desired objective is to save €10 million until the year 2013.

ADELE programme (2004 - 2007)

The first French eGovernment strategy was laid down in the ADELE programme (2004-2007) which was presented on 9 February 2004. ADELE (ADministration ELEctronique – namely ‘eGoverment’) provided a detailed roadmap for the consistent and coordinated development and implementation of the electronic services. The programme was composed of a strategic plan and an action plan to be audited every year and updated accordingly.

The strategic plan set out a detailed framework for the development of eGovernment and defined qualitative and quantitative objectives to attain, together with the mechanisms and means allocated to achieve them. The strategy has been implemented through concrete measures and projects which were described in the ADELE action plan.

The main objective of ADELE consisted in implementing an electronic administration accessible to all, which would move from simply providing information to delivering interactive services enabling users to perform full administrative procedures remotely. This would make life easier for citizens, businesses and local authorities generate confidence and contribute to the modernisation of Public Administration.
eGovernment Legislation

Ordinance on the right of users to communicate with administrative via electronic means (2014)/ Ordinance on the simplification of the relation between the administrations and the user (2013)

The ordinance No. 2014 - 1330 was adopted on 6th November 2014 by the French government. The Ordinance on the right of users to communicate with administrative via electronic means (2014) and the Ordinance on the simplification of the relation between the administrations and the user (2013) were adopted in November 2014. These ordinances aim to simplify the administrative procedures and make them more accessible to citizens. The ordinance No. 2014 - 1330 was adopted on 6th November 2014 by the French government. The ordinance effectively defines the conditions and procedures for exercising the right of users to communicate electronically with the different administrations. It remains aligned with the ordinance No. 2013 - 1005 adopted on 12th November 2013 that allows for the simplification of the relation between the administration and users.

Thierry Mandon presented a list of these 40 measures, many of which represent a great step forward for users as they enable services such as scheduling an appointment at the CAF (Caisse d'allocations familiales) online or applying for the Vitale card online, getting a personal medical certificate, payments of fines via smartphone or purchasing stamps online and several other eServices.

Ordinance on electronic interactions between public services users and public authorities and among public authorities (2005)

This ordinance (‘teleservices ordinance’) was adopted on 8 December 2005 on the basis of the Legal Simplification Law of 9 December 2004. It aims to establish a comprehensive legal framework for the shift to ‘electronic administration’ creating simple and secure electronic interactions between citizens and public authorities. The text covers all exchanges of electronic documents, email or digital communications among public authorities and among citizens and central administration, regional governments and private organisations. Moreover, it grants the same legal status to email as that of traditional paper-based correspondence and legalises the use of electronic signatures by public authorities. Lastly, the text lays down provisions on both the security of exchanges and the interoperability of information systems.

Freedom of Information Legislation

Law on access to administrative documents (1978)

The Law of 17 July 1978 on access to administrative documents grants access to all, to administrative documents held by public bodies. All documents handed over are subject to copyright rules and cannot be reproduced for commercial purposes. Public bodies must respond to requests for documents within one month. A Commission of Access to Administrative Documents (CADA) is tasked with supervision. A complaint must be decided upon by the CADA before it can be appealed to an administrative court.
Data Protection/Privacy Legislation

**Law on 'Informatics and Liberty' (2004)**

The Law on ‘Informatics and Liberty’ was adopted on 6 January 1978. The Law provides a legal framework for the use of identifiers in databases and the processing of personal data by public and private sector organisations. The Law created a National Commission for Informatics and Liberty (CNIL), which is in charge of overseeing its implementation and observance. The CNIL also has an advisory role in the planning of administrative data systems. The Law on Informatics and Liberty was amended by law no. 2004-801 of 6 August 2004 implementing the EU Data Protection Directive (95/46/EC).

eSignatures Legislation

The Law of 13 March 2000 grants legal value to electronic signatures and electronically-signed documents, and further implements the EU Directive 1999/93/EC on a Community framework for electronic signatures. This law was complemented by an application decree issued on 30 March 2001.

Commerce Legislation

**Law for trust in digital economy (2011)**

Adopted on 21 June 2004, the Law for trust in digital economy implements the EU Directive on electronic commerce (2000/31/EC) and sets the legal framework for the development of eCommerce services in France. The law was last amended on 19 May 2011.

eCommunications Legislation

**Law on electronic communications and audiovisual communication services (2008)**

**eGovernment in France**

**February 2016**

---

**eProcurement Legislation**

**Public Procurement Code (2006)**

The latest version of the French public procurement code was adopted on 1 August 2006. It transposes the EU Directives on public procurement (2004/17/EC and 2004/18/EC), including their eProcurement provisions relating to **eAuctions and Dynamic Purchasing System**. The code in question provides for a wider use of a **dematerialised** public procurement, so as to enhance the efficiency of procedures (shortened delays for reception of applications and tenders, electronic access to consultation/information documents, authorised sending of backup copies during the transmission of applications). It is worth mentioning that the new public procurement code states that as from 1 January 2010, the French contracting authorities have the right to require the transmission of applications and tenders in electronic format only. The second part of the code fully transposes specific provisions of Directive 2004/17/EC that are applicable to network operators.

**Re-use of Public Sector Information (PSI)**

**Law on access to administrative documents (1978)**

The Law on access to administrative documents (17 July 1978) was amended by a Government **ordinance** of 6 June 2005 implementing the provisions of the EU Directive on the re-use of public sector information (2003/98/EC).
eGovernment Actors
Main roles and responsibilities

National eGovernment

Policy/Strategy

**Secretary of State for Reform and Simplification of the State**
In France, the eGovernment strategy is under responsibility of the Prime Minister, Mr Valls with support of the Secretary of State for Reform and Simplification of the State, Mr Mandon (Secrétariat d’État à la Réforme de l’État et à la Simplification). The Secretary of State is in charge of the coordination of all work done on the modernisation and simplification of the State.

**General Secretary for Government modernisation (SGMAP)**
Created with the [decree no. 2012-1198](#) of October 2012, the General Secretary for Government modernisation (SGMAP) is placed under the authority of the Prime Minister's Office and made available to the Secretary of State for State Reform and Simplification, the Minister of Decentralisation and the Civil Service, the Minister of Finance and Public Accounts and the Minister of the Economy, Industry and the Digital Sector.

The SGMAP has a dual role. On the one hand, it has an advisory role to the Government in the development, implementation and monitoring of the overall public sector reform program. On the other hand, it has the role of a "strategic partner" for public organisations implementing their reform plans, proving impulse, support and expertise in several areas of reform.

Coordination

**General Secretary for the Modernisation of Public Action (SGMAP)**

Implementation

**General Secretary for the Modernisation of Public Action (SGMAP)**

Within SGMAP, DISIC (Inter-ministerial directorate of information and communication systems) is in charge of piloting the transformation of the public administration information systems. In the context of the eGovernment development, DISC defines IT architecture and repositories, secures major projects in ministries and stimulate the launch of projects fostering the development, accessibility and added value of electronic services.

**All Central Government departments**

Central Government departments deal with the implementation of eGovernment projects placed within their respective jurisdiction.

Support

**General Secretary for the Modernisation of Public Action (SGMAP)**

**National Digital Council (CNNum)**
The National Digital Council (Conseil National du Numérique – CNNum) is an advisory body created on 27 April 2011 by the French President. It consists of eighteen Internet specialists tasked with advising the Government on issues related to digital technology.
More specifically, the CNNum is consulted for advice on "any proposed law or regulation that may have an impact on the digital economy so the government can have insight from the industry". Nevertheless, the CNNum will also issue recommendations on issues of interest without a previous request by the Government.

**The French Documentation, DILA**

The Government’s publishing house, the French Documentation *(Documentation Française)* provides information management services.

The DILA (Directorate of the Legal and Administrative Information) is a directorate from the central administration of the Prime Minister. Issue from the merge of the directorates of French Documentation and of the official journals, it is placed under the authority of the General Secretariat of the Government. Dila performs tasks of legal dissemination, public edition and administrative information.

**Public Interest Grouping ‘Modernisation of Social Declarations’ (GIP-MDS)**

The GIP-MDS gathers the different social security institutions and business federations in the aim to develop joint services enabling businesses to file their social declarations electronically. These services are accessible through the Net-Entreprises website.

---

**Audit/Assurance**

**Court of Accounts**

The responsibilities of the French Court of Accounts cover mandatory and optional examinations of the use of public funds.

**Finance Committees of the Parliament**

Use of public funds is also scrutinised by the Finance Committees of both the National Assembly and the Senate.

---

**Data Protection**

**National Commission for Informatics and Liberty (CNIL)**

The CNIL, the French Data Protection Authority, was created by the ‘Informatics and Liberty’ Law of 6 January 1978 which provides a legal framework for the use of identifiers in databases and the processing of personal data by public and private sector organisations. The CNIL is in charge of overseeing the implementation of this law and also has an advisory role in the planning of administrative data systems.

**French Network and Information Security Agency (ANSSI)**

A decree issued on 8 July 2009 established the French Network and Information Security Agency *(Agence Nationale de la Sécurité des Systèmes d’Information - ANSSI)*. This agency was placed under the authority of the Prime Minister and was attached to the Secretary General for National Defence. It also replaced the Central Directorate for Information System Security (DCSSI) and was assigned wider missions and resources. Its core missions are: detection and prompt reaction to cyber-attacks; continuous surveillance of sensitive Governmental networks; implementation of the appropriate defence mechanisms; prevention of threats through trusted products and services by French operators; advise and support to Governmental entities and operators of Critical Infrastructure; and continuous information on security threats.

**French Computer Security Incident Report Team (CERT-FR)**

The French Computer Security Incident Report Team *(Centre d’Expertise Gouvernemental de Réponse et de Traitemen des Attaques informatiques - CERTA)* is the point of contact for all computer-related security incidents regarding France.
Regional & Local eGovernment

Policy/Strategy
Regional and Local Administrations

Regional and Local Government bodies (regions, counties and municipalities) devise their respective eGovernment policy in compliance with the national eGovernment policy, within the limits of their respective competences.

Coordination

Regional agencies for ICT

In some regions, dedicated agencies for ICT participate in the coordination of regional eGovernment projects.

Implementation

Regional and Local Administrations

Regional and Local Government bodies implement eGovernment projects falling within their respective areas of competence.

Support

Caisse des Dépôts

The Caisse des Dépôts is a State-owned financial institution that performs public-interest missions on behalf of France’s Central, Regional and Local Governments.

Regional agencies for ICT

The National Centre for the Management of Territorial Service (CNFPT)

The National Centre for the Management of Territorial Service (Centre National de la Fonction Publique Territoriale - CNFPT) is at the heart of decentralisation. Through its core missions of agent training and career support of executives, the CNFPT aims to the modernisation of the local public service.

CAP-TIC

CAP-TIC is a company created in February 2000 by the Caisse des Dépôts, which provides technical, economic, pedagogical and legal services to public sector organisations.

Internet Cities Association

The ‘Internet Cities’ (Villes Internet) Association is a network of elected officials, local civil servants, and private and voluntary stakeholders, aimed at supporting the exchange of experiences and practice for the development of the Internet and of Internet-based citizen services at local level.

The Association ‘Internet Cities’ presents annually since 1999, a national label to local governments that implements a local digital public policy. Since 2015, the label for the promotion of ‘internet citizen’ is aimed at “Internet Territories, Cities and Villages”.

It offers also a geolocation mapping portal that lists and presents the services offered by local actors in connection with the ‘internet citizen’ www.atlaas.fr
Audit/Assurance

**Regional Courts of Accounts**
The Regional Courts Internet Cities of Accounts are tasked with examining the use of public funds by public authorities.

**Other**

**Association des Maires de France (AMF)**
The association of French Mayors is the representative association of French Mayors

**Association des Maires Ruraux de France (AMRF)**
The association of the French Rural Mayors is the representative association of mayors of municipalities with fewer than 3,500 inhabitants in France.

**Association of French Regions (ARF)**
The Association of French Regions is the representative association of French regional authorities.

**Assembly of French Counties (ADF)**
The Assembly of French Counties is the representative association of French counties.

eGovernment Infrastructure

Main eGovernment infrastructure components

Portals

Service-Public.fr

The portal launched in October 2000, ‘Service-Public.fr’, is the access point to practical information focused on the daily-life events of public service users. It provides orientation, documentation, online forms and links to public services online.

As of January 2008, two-thirds of administrative procedures (approx. 600) were fully available online. In February 2008, the portal was enriched with the website ‘Administration 24h/24’, a one-stop shop for both citizens and businesses to perform administrative formalities online. ‘Mes démarches 24h/24’ the resulting section of the eGovernment portal features a search engine that leads to the most complete information relating to the keyword entered.

A specific section of the portal (www.pme.service-public.fr) is aimed at simplifying administrative procedures for businesses, in particular small and medium-sized enterprises (SMEs) and freelancers. The services provided are supported by one common electronic signature solution and allow for the electronic access to administrative forms, as well as their eFilling in and online return.

Launched in April 2014, the experimental "Simplified Public Market" (MPS) is now implemented. It allows companies to respond to call for tenders for public contracts by providing only their Siret number and a certificate of honour instead of supporting documents. Similarly since July 2014, an experimental "Simplified State Aid (APS) following the same principle is widespread.

Mon.Service-Public.fr

‘Service-Public.fr’ has been enriched with ‘Mon.Service-Public.fr’, an advanced eGovernment portal aimed at offering unified, personalised and secure access to the entire set of Government services available online, managed by the Directorate-General for State Modernisation (DGME).

Through their personal account users can securely manage their administrative procedures online while accessing at the same time personalised, customised information. This way, the access to online services has been simplified drastically, since the user does not need to remember several passwords. eServices are constantly being added with the ultimate target to provide all possible public eServices via this portal. The owner of a personal account has a secure online personal data space at his/her disposal for entering his personal data once and for all and storing eDocuments.

On 5 July 2010, the new version of ‘Mon.Service-Public.fr’ was presented by the Minister for the Budget, Public Accounts and State Reform with a fully revamped interface intended also to ease the follow-up of procedures and to provide customised information. Since April 2010, the portal has been enhanced with a service enabling its users to notify their change of contact details to twelve bodies at once. Thus, the already existing online service 'I am changing places of residence' became the 'I am changing contact details' service and all users' details can be communicated to several bodies (public, semi-public and private sectors) in a single click.
### Data.gouv.fr

Data.gouv.fr is an open data portal maintained by the French government. The portal hosts datasets produced by corporations, citizens or non-profits as well as government data. Data.gouv.fr also lists datasets released by institutions which have already developed their own open data portals by redirecting users to these portals.

### Mes aides.fr

‘Mes-aides’ is a digital public service "state startup" produced in an unprecedented construction approach by a small independent team hosted by the General Secretariat for Modernization of Public Action (SGMAP) and supported by a community of public officials and citizens. The site ‘mes-aides’ makes use of the free software simulation of the French tax-benefit system OpenFisca (version beta).

### Marché Public Simplifié

Marché Public Simplifié aims to simplify access to public tenders. MPS is part of the “Dites-le-nous une fois” (Share your information once) programme aims at easing the administrative burden on companies by reducing the volume of data required in their exchange with French public services.

### Networks

#### RIE

The RIE (Interministerial Network of the State) is a shared network that carries data exchanged within each Ministry and between Ministries. It promotes and secures the exchanges of data between administrations at the service of eGovernment. On 1 January 2015 it interconnected more than 3,000 sites, for a target of 17 000 sites by the end 2017. The network will gradually be enriched with additional services: secure Internet browsing, unified directory...).

#### ISIS

Operational since November 2007, the ‘Secure Inter-ministry Intranet for Governmental Synergies’ (ISIS) allows for the exchange and sharing of top secret information among Government actors. ISIS is part of the French Network and Information Security Agency (Agence Nationale de la Sécurité des Systèmes d’Information - ANSSI).

### eIdentification/eAuthentication

#### Common eSignature solution

The electronic services provided online to citizens and enterprises via the portal www.service-public.fr are supported by one common electronic signature solution. Thus, only the electronic certificates provided by ‘qualified’ Certification Service Providers (CSPs) are eligible for the online interactions of citizens and businesses with the Government. To become recognised as such, the certificates are evaluated against the requirements of the ‘General Security Framework’. There are three levels of security, namely: medium, high and qualified. The electronic certificates for businesses are issued to natural entities, but there are only to be used on behalf of an enterprise.
France Connect

The Interministerial Directorate of Information Systems is currently building "France Connect," a SSO solution (Single Sign-On), which provides users with an identification mechanism recognized by all digital public services available in France. Without seeking to replace the various suppliers of public identities, France Connect will unify accounts opened by users within different administrations. France Connect will be in experimentation phase from 2015. France Connect will also allow France to implement the European directive eIDAS (Electronic Identification and Signature), which requires the interoperability with identification systems used by Member States to access their online services.

France Connect will be officially launched during the spring 2016.

Government as a Platform (Etat-plateforme)

The Interministerial Directorate for Information Systems is building the foundations of the "Etat plateforme" (State platform), an architecture supporting the creation of a new kind of digital public services. This strategy of transforming the state information system presupposes that the administration itself needs to bring together the various data of the user necessary for its purposes, and offers in return almost ready-to-use services. It deals with services centred on its needs, and not from the organizational carving of administrative structures. The main principles of the State platform are the opening of API by large public providers of data, the flow of data between administrations, and the flow control by users through France Connect.

ePassports

In April 2006, the Ministry for Internal Affairs announced the calendar for the introduction of the first electronic passports in France, progressively introduced between April and July 2006. Embedded with a contact-less chip, the French ePassport contains the digitalised photograph of its owner. The passport is intended to be more than a simple travel document; it could be used for the fulfilment of administrative formalities in the future. On 28 June 2009, the electronic passports were replaced by the biometric passports containing in addition the holder's digitised fingerprints.

eProcurement

Purchase of fiscal stamps

This new online service allows the purchase of fiscal stamps. The electronic stamp is used to pay the rights of some administrative formalities.

eProcurement Platform

All French public entities have been obliged to accept bids submitted electronically in response to formal calls for tenders over a legal threshold published as of 1 January 2005. All Central Government ministries – with the exception of the Ministry of Defence, which has its own platform – can meet this requirement by using the Government-wide eProcurement platform. The platform allows public sector bodies to publish calls for tenders online and receive electronic bids. It is commercialised by UGAP, an inter-ministerial service dedicated to enhancing the efficiency of public procurement.

The use of the platform by local authorities is optional, as these are free to develop their own eProcurement solutions or to adopt commercial solutions, already created on a regional and a local level. In this light, it is worth noting that the Public Procurement Code
states that as from 1 January 2010, the French contracting authorities have the right to require the transmission of applications and tenders in electronic format only.

### eMarketplace of the Burgundy region

This portal is aimed at more than 2,000 public authorities and institutions in the administrative region of Burgundy in the east of France. It is accessible from the region’s eGovernment portal (www.e-bourgogne.fr). Through the platform, public bodies can post calls for tenders that potential suppliers can access and respond to. This eMartketplace was piloted with the support of the French Government as part of France’s ADELE plan for eGovernment, and launched as an operational service at the beginning of 2005. After a successful regional experimentation of its eMarketplace, the Burgundy region has created a consortium made up of five regional authorities of EU countries along with public and private partners in order to put in place the ETENProcure project. This project aims at enabling, across the five pilot regions, electronic bidding for public procurement through safe and intuitive web services for SMEs.

### Knowledge Management

**References.modernisation.gouv.fr website**

The ‘references.modernisation.gouv.fr’ website contains links to the latest version of the eGovernment policy reference documents aimed at public authorities, namely: General Accessibility framework (RGAA); General Security framework (RGS); General Interoperability framework (RGI); Charter for the ergonomics of public websites.

**Adullact.Net platform**

In June 2005, an Open Source Software repository and collaborative platform for cooperative software development for the use of the entire French Administration was launched; ‘Admisource’.

Since July 2008, Admisource has been merged with Adullact.Net, the forge of the Association of Developers and Users of Free Software for Administrations and Regional/Local Governments.
Other Infrastructure

**Légifrance**

*Légifrance* is the official website of the French government for the publication of legislation, regulations, and legal information. Access to the site is free.

Virtually complete, it presents or refers to all concerned institutions or administrations, all texts still in force since 1539 and all the upper courts jurisprudence since 1986 as well as the most pertinent one of all courts since 1875.

**Telepac**

*Telepac* is the official website of the French Ministry of Agriculture, Agrifood, and Forestry for the electronic filing of documents related to the subsidies of the Common Agricultural Policy (CAP).

**Criminal records request**

This is the official website of the French Ministry of Justice dedicated to the electronic requests of criminal records.
Government Services for Citizens

Availability and sophistication of eServices for Citizens

The information in this section presents an overview of the basic public services, which were identified by the European Commission and Member States under the Your Europe initiative that is an EU site designed to help citizens do things in other European countries – avoiding unnecessary inconvenience and red tape in regard to moving, living, studying, working, shopping or simply travelling abroad.

The groups of services for citizens are as follows:

1. **Travel**
2. **Work and retirement**
3. **Vehicles**
4. **Residence formalities**
5. **Education and youth**
6. **Health**
7. **Family**
8. **Consumers**

### 1. Travel

**Passenger rights, documents you need**

**Passport**

Responsibility: Central Government

Website: [http://vosdroits.service-public.fr/](http://vosdroits.service-public.fr/)

Description: Information and forms viewable online. Passport applications are handled by local authorities or by local offices of the Central Government (Préfecture/Sous Préfecture). The status of a request for the delivery of an identity card, or an electronic passport can be followed up online.

**Consular services**

Responsibility: Direction de l'information légale et administrative

Website: [https://monconsulat.diplomatie.gouv.fr/](https://monconsulat.diplomatie.gouv.fr/)

Description: Allows a French expatriate registered as French citizens living outside France to create an account that allows him to access and modify his personal data, security and electoral situation.

**Ariane: alert system**

Responsibility: Ministry of Foreign Affairs

Website: [https://pastel.diplomatie.gouv.fr/fildariane/dyn/public/login.html](https://pastel.diplomatie.gouv.fr/fildariane/dyn/public/login.html)

Description: This free of charge service of the Ministry of Foreign Affairs French allows the traveller to report data on his/her trip abroad. The shall be used in a situation of crisis abroad to contact him/her on the cell phone or to quickly teach his family or relatives in France.
## 2. Work and retirement

**Working abroad, finding a job abroad, retiring abroad**

### Job search services by labour offices

**Responsibility:** Central Government, 'Pôle Emploi'

**Website:** [http://www.pole-emploi.fr/](http://www.pole-emploi.fr/)

**Description:** Fully functional job search facility. Users can access personalised job offers and display their CV online. A [summer jobs search portal](http://www.poleemploi.fr/hs/prospection/programmes-jeunes) has moreover been made available since March 2007.

### Professional qualifications

**Legal information system (incl. information on the regulated professions)**

**Responsibility:** Central government

**Website:** [http://www.legifrance.gouv.fr/Traductions/en-English](http://www.legifrance.gouv.fr/Traductions/en-English)

**Description:** Legifrance is the French government entity responsible for publishing legal texts online. It provides access, in French, to laws and decrees published in the Journal officiel, important court rulings, and collective labour agreements, standards issued by European institutions, and international treaties and agreements to which France is a party. For reference purposes, Legifrance also provides a number of useful links (to parliamentary assemblies, jurisdictions, independent administrative authorities...).

### Taxes, unemployment and benefits

**Access to Family Allowances Fund (Caisse d'allocations familiales (Caf))**

**Responsibility:** Caisse nationale des allocations familiales (Cnaf)

**Website:** [https://wwwd.caf.fr/](https://wwwd.caf.fr/)

**Description:** Allows the citizens to check their accounts, to declare their resources and to update their situation in case it changes (for example as a result of pregnancy, birth, adoption or receipt of a child, the arrival of another person, a death, a new address, new bank account).

**Income taxes: declaration, notification of assessment**

**Responsibility:** Central Government, Ministry of the Economy, Industry and the Digital Sector, Directorate-General for Public Finances

**Website:** [http://www.impots.gouv.fr/](http://www.impots.gouv.fr/)

**Description:** The French tax portal allows individual users to file their returns and pay their income tax online, as well as access their individual fiscal account. Tax declarations are pre-filled by tax authorities before being sent out and tax payers can modify or add information online, if necessary. No supporting documents are needed and the amount of tax that will have to be paid is indicated immediately. Since 2007, citizens can calculate their tax bill themselves and make adjustments to their monthly tax payments, where necessary.

**Application Impôt.gouv**

This mobile application allows taxpayers to declare their income and pay taxes when their prefilled statement doesn't need to be.
Unemployment benefits
Responsibility: Central Government, 'Pôle Emploi'
Website: http://www.pole-emploi.fr/
Description: Information on unemployment benefits, online application system and monthly unemployment status notification.

3. Vehicles
Driving licence
Responsibility: Central Government

Description: eService is available to calculate the evolutions of the electricity or gas bill. Further support is provided via a helpline and an online formulary.
eGovernment Services for Businesses

Availability and sophistication of eServices for Businesses

The information in this section presents an overview of the basic public services, which were identified by the European Commission and Member States under the Your Europe initiative that is an EU site designed to help citizens do things in other European countries – avoiding unnecessary inconvenience and red tape in regard to doing business abroad.

The groups of services for businesses are as follows:

1. Start and grow
2. VAT and customs
3. Selling abroad
4. Staff
5. Public contracts
6. Environment

1. Start and grow

Start-ups, European Company

Registration of a new company
Responsibility: Chambers of Commerce and Industry
Website: http://www.cfenet.cci.fr/
Description: Online administrative procedures for businesses, including business registration.

Intellectual property rights

Patents
Responsibility: Institut National de la Propriété Industrielle, Minstry of Economy
Website: http://www.inpi.fr/fr/services-et-prestations/demarches-en-ligne.html
Description: INPI is a public, fully funded, under the Ministry of Economy, Industry and Digital. The website of INPI provides information on patents, trademarks, and designs, and provides access to information on industrial property and businesses. Several forms and online formularies are available on the website as an eService, for example application for patent, trademark or design online, online brand renewal, and other.

Annual accounts

Submission of data to statistical offices
Responsibility: Central Government, State Secretariat for Industry
Website: http://www.insee.fr/
Description: Data concerning company revenues already declared to the Tax Administration do not need to be resubmitted separately to statistical offices. The same is valid for employees' data submitted to Social security and Employment administrations.
2. VAT and customs

VAT – Basic rules, Cross-border VAT, Check a VAT number (VIES), VAT refunds

**VAT: declaration, notification**

Responsibility: Central Government, Ministry of the Economy, Industry and the Digital Sector, Directorate-General for Public Finances

Website: http://www.impots.gouv.fr/

Description: Online declaration and payment of VAT.

Excise duties

**Corporate tax: declaration, notification**

Responsibility: Central Government, Ministry of the Economy, Industry and the Digital Sector, Directorate-General for Public Finances

Website: http://www.impots.gouv.fr/

Description: Online information and services for all businesses and professionals, including corporate tax declaration and payment.

Reporting imports/exports

**Customs declarations (e-Customs)**

Responsibility: Central Government, Ministry of Economy, Industry and Digital Sector

Website: http://www.douane.gouv.fr/

Description: eServices for customs declarations and payments.

3. Selling abroad

Providing services abroad, distance selling, importing/exporting rules

**Purchase of the fiscal stamps online**

Responsibility: Direction de l'information légale et administrative (Premier ministre)

Website: https://timbres.impots.gouv.fr/pages/achat/choixTimbres.jsp

Description: The citizens are allowed to purchase fiscal stamps online for the following purposes: fiscal stamps for passports, fiscal stamps for the French Office for Immigration and Integration (OFII), and the fiscal stamps to make an appeal to a court decision.

**Competition rules, unfair contract terms, consumer guarantees, defective products**

**French law**

Responsibility: Central government

Website: http://www.legifrance.gouv.fr/Traductions/en-English

Description: Legifrance is the French government entity responsible for publishing legal texts online. It provides access, in French, to laws and decrees published in the Journal officiel, important court rulings, and collective labour agreements, standards issued by European institutions, and international treaties and agreements to which France is a party. For reference purposes, Legifrance also provides a number of useful links (to parliamentary assemblies, jurisdictions, independent administrative authorities...).
Defender of rights
Responsibility: Défenseur des droits
Website: https://formulaire.defenseurdesdroits.fr/defenseur/
Description: The Defender of Rights is an independent authority of government in charge since March 29, 2011 to ensure the protection of individual rights and freedoms. It is based on the work of a network of delegates through the country: they may receive you, inform you, guide you and process your claim. This claim can be submitted online as an eService.

4. Staff
Terms of employment, social security, equal treatment, redundancies

Social contributions for employees
Responsibility: Central Government, Public Interest Group on the Modernisation of Social Declarations
Website: http://www.net-entreprises.fr/
Description: The Net-entreprises.fr portal provides a range of services relating to social security contributions, including information, simulation, as well as secured declarations and payment using electronic certificates.

Health and safety

Declaration of an accident at work online (DAT)
Responsibility: Federal Ministry of Labour, Social Affairs and Consumer Protection (Labour Inspectorate)
Website: http://www.net-entreprises.fr/html/dat.htm
Description: The web portal allows an employer to declare an accident at work or whilst commuting online after the registration. The declaration must be submitted by the employer or the agent to the primary health insurance fund (CPAM) within 48 hours from the acknowledgment of the accident.

5. Public contracts
Rules and procedures, tools and databases, reporting irregularities

Public procurement / eProcurement
Responsibility: Central Government, Ministry of Economy, Industry and Digital Sector
Website: http://www.marches-publics.gouv.fr/; https://mps.apientreprise.fr/
Description: All Central Government ministries and entities–with the exception of the Ministry of Defence, which has its own platform – can meet this requirement by using the Government-wide eProcurement platform 'Marches-Publics.gouv.fr'. Through this platform, public sector bodies can publish calls for tenders online and receive electronic bids. Its use by local authorities is optional, as they are free to develop their own eProcurement solutions, or to adopt commercial solutions. "Simplified Public Market" (MPS) is widespread since 1 October 2014. It allows companies to respond to call for tenders for public contracts by providing only their Siret number and a certificate of honour instead of supporting documents.
## 6. Environment

| EMAS certification, energy labels, eco-design, EU eco-label |

### Environment-related permits (incl. reporting)

- **Responsibility:** Central Government, Ministry of Ecology, Energy, Sustainable Development and the Sea
- **Description:** Information and downloadable forms for environment-related permits.
**European Commission**

The factsheets present an overview of the state and progress of eGovernment in European countries.

Joinup is a joint initiative by the Directorate General for Informatics (DG DIGIT) and the Directorate General for Communications Networks, Content & Technology (DG CONNECT).

Production/Publishing: ISA Editorial Team, Kurt Salmon S.A.
An action supported by ISA
This action is supported by ISA, the European Commission's programme for interoperability solutions for European public administrations.

Why ISA?
Administrative procedures have the reputation of being lengthy, time-consuming and costly. Electronic collaboration between public administrations can make these procedures quicker, simpler and cheaper for all parties concerned, in particular when transactions need to be carried out cross-border and/or cross-sector. ISA supports this type of electronic collaboration. With more than 40 actions it provides tools, services and frameworks for the modernisation of public administrations in Europe, across e-borders and sectors.
