WHAT'S INSIDE

eGovernment in Malta

Visit the e-Government factsheets online on Joinup.eu

[Joinup](http://Joinup.eu) is a collaborative platform set up by the European Commission as part of the [ISA² programme](#). ISA² supports the modernisation of the Public Administrations in Europe.

Joinup is freely accessible. It provides an observatory on interoperability and e-Government and associated domains like semantic, open source and much more.

Moreover, the platform facilitates discussions between public administrations and experts. It also works as a catalogue, where users can easily find and download already developed solutions.

The main services are:

- Have all information you need at your finger tips;
- Share information and learn;
- Find, choose and re-use;
- Enter in discussion.

The logo for Joinup, featuring the word "joinup" in a lowercase, blue, sans-serif font. The letters are connected, with "j" and "o" joined, "i" and "n" joined, and "u" and "p" joined. The logo is positioned at the bottom right of the text area, with a thin blue line extending from the left and right sides of the text area to the logo.

This document is meant to present an overview of the eGovernment status in this country and not to be exhaustive in its references and analysis. Even though every possible care has been taken by the authors to refer to and use valid data from authentic sources, the European Commission does not guarantee the accuracy of the included information, nor does it accept any responsibility for any use thereof.

Country Profile

Basic data and indicators

Basic Data

Population (1 000): 434,403 inhabitants (2016)

GDP at market prices: 9,898.0 million Euros (2016)

GDP per inhabitant in PPS (purchasing Power Standards EU 28=100): 88 (2015)

GDP growth rate: 5.0% (2016)

Inflation rate: 0.9% (2016)

Unemployment rate: 4.8% (2016)

General government gross debt (Percentage of GDP): 64.0% (2015)

General government deficit/surplus (Percentage of GDP): -1.4% (2015)

Area: 316 km²

Capital city: Valletta

Official EU language: Maltese, English

Currency: EUR

Political Structure

Malta – whose territory includes the islands of Malta, Gozo and Comino, and other minor islands – is a **parliamentary republic**. It was a British colony from 1800 until its independence on 21 September 1964. The Republic was proclaimed on 13 December 1974.

Legislative power is held by a unicameral [Parliament](#) (House of Representatives), currently made up of 69 members elected for five years. This single member constituency system permits a plurality premium.

The Head of State is the [President](#), who is elected by the House of Representatives for a five-year term and has an essentially ceremonial and symbolic role. Executive power lies with the Prime Minister and his Cabinet. The Prime Minister, appointed by the President for a five-year term, is the leader of the majority party or of a majority coalition in Parliament. Ministers are appointed by the President on the advice of the Prime Minister.

The [Constitution](#) of Malta was adopted in 1964 and substantially amended in 1974 and 1987.

Malta became a member of the European Union on 1 May 2004.

Head of State: President [Marie Louise Coleiro Preca](#) (since 4 April 2014).

Head of Government: Prime Minister [Joseph Muscat](#) (since 11 March 2013).

Information Society Indicators

Generic Indicators

The following graphs present data for the latest Generic Information Society Indicators for Malta compared to the EU average. Statistical indicators in this section reflect those of [Eurostat](#) at the time the Edition is being prepared.

eGovernment State of Play

The graph below is the result of the latest [eGovernment Benchmark¹](#) study, which monitors the development of eGovernment in Europe, based on specific indicators. These indicators are clustered within four main top-level benchmarks:

- **User Centricity** – indicates to what extent (information about) a service is provided online and how this is perceived.
- **Transparent Government** – indicates to what extent governments is transparent regarding: i) their own responsibilities and performance, ii) the process of service delivery and iii) personal data involved.
- **Cross Border Mobility** – indicates to what extent EU citizens can use online services in another country.
- **Key Enablers** – indicates the extent to which 5 technical pre-conditions are available online. There are: Electronic Identification (eID), Electronic documents (eDocuments), Authentic Sources, Electronic Safe (eSafe), and Single Sign on (SSO).

These top-level benchmarks are measured using a life-events (e.g. mystery shopping) approach. The following life-events were used for measuring the eGovernment Benchmark top-level indicators: Business Start-Up and Early Trading Operations, Losing and Finding a Job, Studying, Regular Business Operations, Moving, Owning and Driving a Car, and Starting a Small Claims Procedure. The figure below presents the development of eGovernment in Malta compared to the EU average score.

Recent News

December 2016

The Malta Community Chest Fund (MCCF) in collaboration with Malta Information Technology Agency (MITA) launched a new mobile application to serve as a tool for communication between the public and volunteers³. In addition to providing general information about the foundation, the application also provides users with access to online forms, information related to volunteers and to the foundation's audited accounts.

November 2016

The Office of the Prime Minister, supported by the Malta Information Technology Agency, launched a Government mServices Strategy for 2017-2018. This strategy puts forward the Government's plans for the provision of public services over mobile devices (mServices) for the next two years and is another building block in the implementation of the Public Service Renewal Programme and the achievement of the ultimate vision of providing access to 24x7 public services from anywhere. The launch of the Government mServices Strategy was accompanied by the soft launch of a number of public services through mobile devices, referred to as mServices⁴. The initial services included under mServices are the first wave of public services to exploit the mobile channel and focus on the mCommunications category. They are also the first ones to adopt the new approach to introducing public services by making their associated mobile apps available to dedicated focus groups for beta testing. In this way, interested stakeholders are involved in the development process of such services from the first stage of initiation. The feedback gained from this exercise is being used to improve these services before their official mServices launch for public use in March 2017.

October 2016

Malta has been reconfirmed as the leading example of provision of eGovernment Services in the [eGovernment Benchmark Report 2016](#). As in 2015, Malta again attained an exceptional result by leading in all the top-level indicators and ranking first in the overall results.

September 2016

Following the issue of a Green Paper for a National Cyber Security Strategy in late 2015, which led to a nation-wide consultation process during the first half of 2016, the Minister for

⁴ <http://www.independent.com.mt/articles/2016-12-15/education/Mobile-Government-the-way-forward-6736167932>

Competitiveness and Digital, Maritime and Services Economy, launched the first [National Cyber Security Strategy](#) (NCSS) on 23 September 2016. The strategy serves as a framework to protect information systems, networks and information on the internet, together with the respective users of the services that they provide; namely government, the private sector and civil society. The strategy is one of the action items proposed by [Digital Malta](#) - National Digital Strategy for the years 2014-2020. The key principles of the National Cyber Security Strategy aim to reflect the various facets of cyber security and the essential underlying complex nature of cyber space. This Strategy was articulated by the Malta Information Technology Agency (MITA), which shall also coordinate the implementation of the Strategy, including leading a National Cyber Security Awareness Campaign over the next two years through MITA's Digital Outreach Team.

August 2016

Malta ranked 30th in the eGovernment Development Index and 25th in the eParticipation Index, amongst all 193 member states of the United Nations (UN). The results were published in the [UN eGovernment Survey 2016](#) report issued by the UN Department of Economic and Social Affairs. This year, Malta achieved a significant improvement; up ten places in the first index from the 40th placement in 2014. Similarly, Malta made an outstanding jump of 46 positions from the 71st placement in the second index in 2014.

July 2016

On 7 July 2016, the Planning Authority in collaboration with the Malta Information Technology Agency (MITA), launched a new mobile app aimed to facilitate its provision of services to the general public. The main focus of this application is to allow users to access dynamic data about planning applications and enforcements directly from their smartphones through a map based system. This application also allows users to report illegal development together with photographic proof.

Hon. Dr. Owen Bonnici, Minister for Justice, Culture and Local Government, launched a new eService that allows lawyers and legal prosecutors to electronically present judicial letters to the courts. Users also have the ability to submit online payments to completely digitise this process.

June 2016

The National Blood Transfusion Service (NBTS) in collaboration with MITA Information Technology Agency (MITA), launched a mobile application aimed to facilitate instant communication between the Maltese Blood Donors community and NBTS. The Blood Donors MT mobile app provides a number of features such as regular news updates, schedule of upcoming events and a personal journal so that users can maintain a record of their donations.

The Malta Information Technology Agency (MITA) successfully leveraged the transitional measures of the new eIDAS Regulation (910/2014) to ensure a continued recognition for the new Identity Card and the Qualified Certification Authority. The new Identity Card is considered as a Qualified Secure Signature Creation Device (QSCD) under the new Regulation, which entered into force on 1 July 2016. This will enable the Signing Certificate on the Card to create Qualified Electronic Signatures (QES), which are legally equivalent to handwritten signatures. Additionally, following an extensive exercise with the Malta Communications Authority (MCA), the Certification Authority has been placed on the Malta Trusted List and so will continue to benefit from its qualified status subject to the submission of a conformity assessment report by 1 July 2017.

March 2016

The Malta Information Technology (MITA), in collaboration with Identity Malta, completed the first phase of the overhaul of the current electronic identification (eID) system and launched the new Single Sign On (SSO) screen currently accessible from the [myGov](#) Live Web portal. The newly upgraded technology ensures better performance, stability and reliability to provide government with a better infrastructure for user authentication. Most importantly, this launch included also a new SSO screen, which, when integrated by the Service Providers, will provide users with harmonised experience with facilitated access to key functions and coherent messages, greatly improving the eID Authentication process. MITA will now start planning the subsequent and final phase of the eID Technology Upgrade, which will see a realignment of the eID authentication levels to a 'Basic' assurance level, using account and password, and a 'High' assurance level using the ID Card's chip and PIN.

January 2016

Malta Information Technology Agency (MITA) in collaboration with Heritage Malta, launched a mobile application with various interactive audio visual features to enhance visitors' experience when visiting [Tarxien Temples](#). This will allow visitors to further appreciate the importance of this archaeological site. The app is essentially a human centred interactive guide that provides information about the site including artefacts found both physically on site or displayed at the National Museum of Archaeology. Visitors can download the free version of the app using title "Tarxien Temples" from Google Play Store and App store. Tarxien Temples App also provides other optional premium features through inapp purchases.

December 2015

The Malta Police Force in collaboration with the Ministry for Home Affairs and National Security deployed a new electronic service that would allow citizens to submit an [online request for a Police Conduct Certificate](#). The electronic identity card is used as a means of authentication.

October 2015

The Courts of Justice launched a new service for legal practitioners (lawyers and legal procurators). As of 1 October 2015, legal practitioners can file cases before the Administrative Review Tribunal online. The tribunal reviews administrative acts and deals with complaints from citizens or companies over decisions taken by the country's public administration. The online services allows legal professionals to upload their scanned documents, and manage the fee payments online.

September 2015

The Customs department deployed a new IT system for the clearance of goods for export. The introduction of this system is in line with Customs 2020 programme which is spearheaded by the European Commission to modernise customs processes and introduce an electronic, paper-free customs environment and streamline customs processes and procedures. The system, which is known as the [National Export System \(NES\)](#), is mobile device friendly and is available to all authorised users.

July 2015

On 29 July 2015, Hon. Dr. Owen Bonnici, Minister for Justice, Culture and Local Government announced the launch of a new electronic service MyActs; i.e. online case management⁵. This electronic service enables citizens to be able to view all the acts that have been presented on their behalf to at all civil courts. The service is available at the portal of the Ministry and has been developed by Malta Information Technology Agency (MITA) and the Courts of Justice officials. In order to access this service, the user needs to use an eID, after which four sections can be accessed:

- ▶ Register: with all the names of the parties mentioned in the act, the date when it was presented and other relevant detail;
- ▶ The Notification: with information on whether the act has been notified or not; i.e. whether all parties have been notified;
- ▶ Lawyers: with information on which lawyer presented the act; and
- ▶ Documents: where a scan of the actual act (currently limited to the Magistrate Courts) can be found.

June 2015

In June 2015, under the umbrella of Malta's Public Services Online project, a workshop on guiding and encouraging citizens to use online services was organized by Denmark's Digital Agency and Malta Information Technology Agency (MITA). Around 100 local council representatives participated in this workshop. MITA believes that the promotion of online government services by local administrations can boost the use of eGovernment services in general. A public awareness campaign was launched in May, using TV, radio, billboards and online tutorials to promote eGovernment services.

Malta has been reconfirmed as leader in the delivery and performance of eGovernment services amongst 33 countries (28 European Union member states together with Iceland, Norway, Serbia, Switzerland and Turkey). The results were published in the eGovernment Benchmark Report 2015 issued by the European Commission. The benchmarking study carried out by Capgemini, IDC, Sogeti and the Politecnico di Milano measures four top-level indicators as well as compares the performance of eGovernment services between the participating countries. As in last year, Malta has again attained an exceptional result by leading in all the top-level indicators and ranking first in the overall results.

May 2015

On 11 May 2015, Malta Information Technology Agency (MITA) Head of Strategy and Business Department Emanuel Darmanin, in the presence of Parliamentary Secretary for Competitiveness and Economic Growth, Hon. Dr. José Herrera, announced the award of two grants of EUR 15,000 to two start-ups following a competitive call (Start-APP EUR 15K Challenge). The call was organised in line with Government's policy to stimulate innovation and instil an entrepreneurial mind-set among young entrepreneurs. The call requested start-ups to propose solutions for the resolution of 'pain points' in the area of development planning and cultural heritage using mobile app technology in combination with public data that were made available by the Malta Environment and Planning Authority (MEPA) and Heritage Malta.

⁵ <http://www.timesofmalta.com/articles/view/20150730/local/my-acts-will-let-you-track-your-civil-cases-online.578539>

March 2015

On 11 March 2015, the Malta Information Technology Agency (MITA) launched a new project – Public Services Online – aimed at enhancing knowledge and take-up of eGovernment services. The project was launched by MITA’s Executive Chairman Tony Sultana together with Parliamentary Secretary for Competitiveness and Economic Growth Hon. Dr. Jose’ Herrera and Principal Permanent Secretary Mario Cutajar.

The project, co-financed through the European Social Funds, is being coordinated by MITA together with other stakeholders including CDRT, various Ministries and Digitaliseringsstyrelsen (the Danish Government Digital Agency).

The project is divided into three pillars:

1. Research on why citizens use or do not use eGovernment services and what are the features that they would like to see in such services;
2. Training to various public sector officers who on a daily basis interact with citizens or businesses at their respective ministries or departments. Moreover, a workshop will be organised for key decision makers within Government to discuss the strategy ahead for Government in leveraging technology for simplification of public administration and the provisioning of the next generation of eGovernment services;
3. An awareness campaign on a number of eGovernment services, including tutorials on how to use such services.

February 2015

In February 2015, the Malta Information Technology Agency (MITA) launched a new strategy that sets the development path for the period 2015 – 2017. It sets out a vision to transform the Agency into the ‘Digital Leader for the Government of Malta’. The strategy establishes how the Agency will become an innovative, agile and open organisation with an empowered workforce. In the next three years, MITA will upgrade its service portfolio and ensure that the services it provides are fit for purpose, flexible, customisable and competitively priced. The Agency will also evolve to keep the pace with the new enterprise ICT landscape of cloud services, mobility, BYOD and social media.

2001-2014

For previous news items, please consult the factsheets for past years, accessible through this [link](#).

eGovernment Strategy

Main strategic objectives and principles

Current eGovernment status

Malta has been in the forefront in the provision of user-centric online public services for both citizens and businesses. The focus of the eGovernment unit is now to bring all the Government of Malta online services together in one simple and seamless framework.

The national portal '[Gov.mt](#)' is the central source for all citizen services and governmental information, across the board, whilst the [BusinessFirst](#) is the national portal for businesses. The government plans to implement an aggressive eGovernment programme geared at transforming public services into catalysts of a more competitive economy for Malta. The main **targets** are enlisted in the Digital Malta Strategy (2014-2020).

Digital Malta (2014 -2020)

[Digital Malta](#) is the national ICT strategy for the years 2014-2020. It aims to provide a vision for the country to prosper as a digitally enabled nation in all sectors of society.

The core principles underpinning the implementation of the Digital Malta vision are:

- ▶ Ensuring all citizens are offered the possibility to benefit from ICT as a fundamental right.
- ▶ Advocating proactive leadership, and delivering programmes that meet needs.
- ▶ Supporting national priorities in line with government policy, the National Reform Programme and the EU obligations.
- ▶ Engaging the private sector as an important player in the delivery of the Strategy.
- ▶ Optimising value and accountability.
- ▶ Ensuring collaboration between stakeholders to make the best use of national strategic information assets, encourage synergies and minimise fragmentation.
- ▶ Encouraging a more-environmentally friendly society through greener procurement, implementation and application of ICT.
- ▶ Supporting and enabling Research and Innovation (R&I) in identified areas of strength, capability and centres of excellence (smart specialisation).
- ▶ Adopting an open and experimental mind-set, capitalising on lessons learned from success stories and respecting best practices and international standards.
- ▶ Maximising opportunities from multiple funding sources, including European and international funding programmes and the private sector.

Building on past and present successes, the strategy will, above all, focus on the challenges needed to take up to address the gaps towards becoming a universally digitised society. From the citizen's perspective this will translate in enhancing their digital capability to better and more efficiently access healthcare and social services, connect the elderly and socially excluded, improve education for all, and create higher-quality jobs. From an economic perspective digital competence and specialist ICT skills need to be widened, and national policy and strategies adjusted, to strengthen Malta's workforce and make its businesses more innovative and competitive.

Within this context, The Strategy outlines three strategic themes:

- ▶ Digital Citizen;
- ▶ Digital Business;
- ▶ Digital Government.

The above themes are supported by three strategic enablers:

- ▶ Regulation and Legislation;
- ▶ Infrastructure;
- ▶ Human Capital.

In support of this transformation, the goals are that ICT becomes the underlying infrastructure and driver behind every economic activity. ICT should make public administration more responsive, use of natural resources more sustainable, the legal and regulatory environment more business-friendly, and the SME and NGO communities more connected. Above all ICT should become an empowering tool for young entrepreneurs and a major source of impetus for the creation of more jobs and growth by Malta's key and emerging economic sectors.

The [Ministry for Competitiveness and Digital, Maritime and Services Economy](#) (MCDMS) is responsible for the implementation of a Digital Economy for Malta, and has the overall governance of the eGovernment vision, strategy and associated programmes. The Ministry provides leadership and has ultimate responsibility for the successful delivery of the ICT programme.

The implementation of a Digital Economy requires the involvement and collaboration of various key players and entities. Amongst these, the Malta Communications Authority (MCA) and the Malta Information Technology Agency (MITA) are considered to be main actors.

Government mServices Strategy 2017 – 2018

Citizens and businesses regularly come into contact with public services at various instances of their daily lives. More convenient access to public services will certainly help individuals, families and businesses to take better care of their personal, professional and commercial interests. In these circumstances, the Government aims to pursue new and innovative ways of providing its services. Another government goal is to give public officers more modern and flexible means of providing personalised and value-added services to citizens and businesses, at the time and place where these services are needed. This shall transform the public sector into one that is more modern, agile and capable of changing its procedures as necessary to be more effective and less bureaucratic. Within this context, the Office of the Prime Minister launched a [Government mServices Strategy](#) for the years 2017 and 2018 that outlines the approach being adopted to introduce public services through mobile devices, referred to as mServices.

Alongside public services already offered via the eGovernment programme, the introduction of mServices is intended to help achieve the Government's goal of bringing public services closer to citizens on a 24x7 basis. Therefore, the vision of the Government mServices initiative is "Access to 24x7 Public Services from Anywhere". The Strategy is based upon 11 principles:

1. Enabling mobility through the introduction of mServices;
2. Appropriate service channels, particularly the notion of mobile first;
3. Citizen-centricity when designing and implementing mServices;
4. Simplification of processes when introducing mServices;
5. Personalisation of mServices;
6. User experience that shall be seamless across multiple service channels;
7. Collaboration between public entities to share data already residing within the Public Administration and achieve a once-only request for data from citizens and businesses;
8. Agility and timeliness in introducing the right mServices, as and when needed;
9. Accessibility of mServices, making them easy to discover and use;
10. Awareness and training through publicity campaigns and online training to guide and assist stakeholders;
11. Building trust in mServices through the application of appropriate security measures.

It is generally possible to classify mServices into one or more of four categories: mCommunications deals with two-way communication of Government with citizens and

businesses; mTransactions handles transactional services, including payments that may require user identification; mDemocracy further increases citizen participation in political decision making while mAdministration introduces mobile-based tools for public officers to increase their mobility and facilitate personalised public services on location.

Malta Cyber Security Strategy

Following the issue of a Green Paper for a National Cyber Security Strategy in late 2015 that led to a nation-wide consultation process during the first half of 2016, the Government of Malta launched the first [National Cyber Security Strategy](#). The strategy serves as a framework to protect information systems, networks and information on the internet, together with the respective users of the services that they provide; namely Government, the private sector and civil society. The strategy is one of the action items proposed by [Digital Malta](#) - National Digital Strategy for the years 2014-2020. The key principles of the National Cyber Security Strategy aim to reflect the various facets of cyber security and the essential underlying complex nature of cyber space.

Information Security Policy

Among other proposed action items, the Malta Cyber Security Strategy calls for consolidation of the information security framework within the public sector. Such a proposal is expected to be carried out through the upcoming Information Security Policy, which is based upon ISO 27001 Information Security international standard and shall be applicable to all of the public sector.

Information Security includes three main dimensions: confidentiality, availability and integrity, and involves the application and management of appropriate security measures for a wide range of threats, with the aim of ensuring sustained business success and continuity, and minimising impacts of information security incidents. (Reference [ISO/IEC 27000](#))

The full version of the Information Security Policy can be accessed [here](#).

Malta Information Technology Agency (MITA) Strategy (2015 – 2017)

MITA launched a new [Strategy](#) that sets the development path for the period between 2015 and 2017. It sets out a vision to transform the Agency into “the Digital Leader for the Government of Malta.” This is a bold but realistic vision.

The Strategy establishes how the Agency needs to become an innovative, agile and open organisation with an empowered workforce. In the next three years, MITA will upgrade its service portfolio and ensure that the services it provides are fit for purpose, flexible, customisable and competitively priced. The Agency will also evolve to keep the pace with the new enterprise ICT landscape of cloud services, mobility, BYOD and social media.

The Strategy is comprehensive and contributes directly towards achieving EU targets that are established in the Digital Agenda for Europe and national targets set in the Digital Malta Strategy. It identifies 40 actions, grouped under 5 strategic themes: ‘An Agile and Pro-active Agency’; ‘ICT Policy, Strategy & Governance’; ‘Information Technology Services’; ‘Information Systems’; and ‘Application and Take-up of ICTs’. These actions ensure that MITA delivers best value for the taxpayer and that government continues to implement new ways of doing business more efficiently through ICT and, in parallel, reducing the total cost of ownership.

Previous eGovernment Strategies

MITA's Strategic Plan (2009 - 2012)

The strategy targets were materialised through the implementation of Malta Information Technology Agency's [Strategic Plan 2009-2012](#). The new ICT strategy focused on five strategic **priorities**.

- ▶ **SP1:** To lead ICT strategy development and drive the deployment of an effective ICT Governance Framework within the public sector.
- ▶ **SP2:** To deliver and sustain a robust, resilient and secure ICT infrastructure and IT services to Government.
- ▶ **SP3:** To transform public service delivery through the application of ICTs.
- ▶ **SP4:** To enable the growth of the knowledge economy through the engendering of a life-long ICT learning framework.
- ▶ **SP5:** To deliver quality of life improvements through innovative citizen-centric application of ICTs.

Out of these five strategic priorities, eGovernment was specifically treated in the 3rd pillar, while it was also served by a parameter of the 5th pillar. In more detail, the [MITA](#) included in its ICT strategy the following **objectives** with clear reference to eGovernment:

- ▶ Design, develop and operate a state-of-the-art next-generation eGovernment platform based on open technologies, serving as a unique user experience, pan-European and single point of contact for all online public services.
- ▶ Retrofit all current eGovernment services into the new eGovernment platform to enhance the consolidation effect of having a single point of contact for citizens' access to online public services.
- ▶ Develop a secure, scalable and open technological layer to enable trusted third parties to integrate their electronic services with the facilities offered by the next generation eGovernment platform.
- ▶ Establish a Government-to-Business (G2B) variant of the eGovernment platform intended to aggregate, consolidate and simplify government-related administrative services, processes, notifications and procedures that businesses need to use in their relations with the Government.
- ▶ Develop and deploy an eProcurement system, allowing the local and EU-based commercial community to be in a position to be alerted on public procurement processes and also to submit their tenders electronically.
- ▶ Develop a policy framework and implement a mechanism to enrol and enable trusted third party individuals and organisations to serve as 'Agents' for the delivery of over-the-counter public services through the use of the agent-enabling capability eGovernment platform.
- ▶ Develop an open platform to serve as a tool for the proliferation of electronic services aimed at encouraging and facilitating citizen participation in government-led consultative processes.

National ICT Strategy for Malta (2008 - 2010)

The National ICT Strategy for Malta 2008-2010 was launched in December 2007, under the heading 'Malta: The Smart Island'. The strategy built upon the achievements of the previous ICT Strategy 2004-2006. The Smart Island Strategy sought to address proactively the major challenges which the country's development in this sector shall inevitably face. The Smart Island strategy was a complex web of inter-wined initiatives constructed through a simple traditional 'hub-and-spoke' model. It was based upon seven inter-related strategic **streams**:

- ▶ Create a robust ICT Environment and next generation infrastructure;

- ▶ Provide a connected society - bridging the last and the new miles;
- ▶ Develop human potential into a smart workforce;
- ▶ Put an "e" to everything - enhancing citizens' quality of life through ICTs;
- ▶ Reinvent Government - transformation and open Government;
- ▶ Take Care of (e) Business;
- ▶ Develop a world - leading ICT industry.

These streams were structured according to five strategic **parameters** serving as the policy boundaries that determine the strategy's mapping:

- ▶ **Three landscape determinants:** The 'Smart Island' is moulded on four major directional waypoints which define the landscape of the national information society and economy against the backdrop of the global and European contexts.
- ▶ **Smart City Malta:** It will re-define the relevance of the information economy in Malta and will serve both as an enabler for the attainment of the ICT services hub vision and as a motivational driver for the development of our human resources.
- ▶ **360-degree approach:** The 'Smart Island' strategy is a national strategy, thus it was developed through a '360-degree approach' through which the interests and objectives of the wider information society and economy have been prioritised.
- ▶ **Based on leading international practice:** The strategy has been developed, based on the lines of the best international practice available in the ICT sector.
- ▶ **Result-not textbook-driven:** The 'Smart Island' is neither built on textbook strategies, nor on stock processes. It is built on the critical mass of the experience of the multiple stakeholders.

Local Electronic Policy (2002 - 2004)

To extend the development of eGovernment to the local government level, a [Local Councils Electronic Policy](#) was adopted, in early 2002, on the basis of an agreement between the Government agencies (the eMalta Commission and the Department of Local Councils) and the Local Councils. The partnership aimed at empowering Local Councils rendering **centres** of **ICT-excellence** in their locality and playing a primary part in the following four **areas**: Social inclusion and digital divide; Best value service delivery satellite; Champion eDemocracy; and ICT take-up.

The partnership consisted of five elementary **principles**, which served as the fundamental pillars for building a sustainable long-term relationship ensuring the best levels of service delivery to the public.

- ▶ **Principle 1** - Local Councils at the core of eGovernment;
- ▶ **Principle 2** - Use ICT to provide the best tailor-made services for residents;
- ▶ **Principle 3** - Foster eDemocracy and citizen participation;
- ▶ **Principle 4** - Position Local Councils as centres of ICT-dissemination;
- ▶ **Principle 5** - Local Councils to progress at their own pace.

The partnership was the forerunner of the Agents Framework that will see eGovernment delivered through single points of contact which are closer to the end-user. The Local Councils remained an important focal point in this respect. The private sector has joined this network of intermediaries that use the electronic services to deliver important public services packaged with their commercial services - at no additional cost to the Government or the Citizens/Businesses.

The 'Smart Island' strategy saw eAgents becoming primarily important for the modernisation of the Public Administration so that the investment put into eGovernment can be opened to trusted third parties (including Local Councils, NGOs, professionals, etc.) in order to deliver all public services directly to their clients.

eGovernment Legal Framework

Main legal texts impacting on the development of eGovernment

eGovernment Legislation

Current status

There is currently no overall eGovernment legislation in Malta. The most relevant sections of the legislation and the public services directives that constitute the eGovernment regulatory framework are the following but more information is available further below:

- ▶ The Criminal Code - Book First, Part II, Title IX, Sub-title V thereof entitled "Of Computer Misuse" (Chapter 9 of the Laws of Malta);
- ▶ Data Protection Act (Chapter 440 of the Laws of Malta);
- ▶ Electronic Commerce Act (Chapter 426 of the Laws of Malta);
- ▶ Electronic Communications (Regulation) Act (Chapter 399 of the Laws of Malta);
- ▶ Electronic Communications (Income Tax) Regulations (Subsidiary Legislation 372.23);
- ▶ OPM Circular No 15_2007 - Usage of Electronic Identity Management Tools;
- ▶ Directive 3.1 amending the Public Administration Act – Elimination of requirement to produce civil status certificates;
- ▶ ICT Governance Framework. Important parts of the framework are related to the traditional definition of eGovernment: Website Policy; Website Directive; Website Content and Presentation Standard; Website Accessibility Standard; Website Security Standard; Website Taxonomy Standard; Electronic Payment Service Policy; Mobile Messaging Service Policy.

Freedom of Information Legislation

[Freedom of Information Act \(2008\)](#)

The Act's aim is to establish a right to information held by public authorities to promote added transparency and accountability in government. Specifically, the Freedom of Information Act aims to grant citizens more rights in accessing information held by the government. The law draws upon elements of similar acts established in other countries. The Government of Malta published in the summer of 2009 [Law Number 218](#), which was a commencement notice that paved the way for the Maltese Freedom of Information Act 2008 to come fully into force on 1 August 2010. The commencement notice establishes the Information and Data Protections Commissioner as the regulatory body (change of name and extended responsibilities), and furthermore gives all public sector bodies (including local government) one year to prepare and publish the information asset lists, as defined by the Freedom of Information Act 2008.

Data Protection/Privacy Legislation

[Data Protection Act \(2001\)](#)

The Data Protection Act was passed on 14 December 2001 and came fully into force in July 2003. It was introduced in order to render Maltese law compatible with EU Data Protection Directive ([95/46/EC](#)), even though Malta was not yet an EU Member State at that time, this was a prerequisite prior to joining the EU. It outlines principles of 'good information/ data handling' to guarantee the protection of personal information. Data Controllers, such as educational institutions, employers and banks, are obliged to inform individuals of the reasons for collecting information about them. Furthermore, individuals are to be assured

that the data collected will not be used for any other reason than for the purpose it was collected and are granted rights of access to the personal information held by the data controller. The Act provides grounds for processing "personal data" but makes special provision for processing "sensitive personal data", a sub-set of personal data, in very specific stipulated circumstances.

Regulation 2016/679/EU will eventually supersede this Act on the protection of natural living persons with regard to the processing of personal data and on the free movement of such data, generally known as the General Data Protection Regulation. This Regulation will come into force in its entirety in all EU Member States from 25 May 2018.

eCommerce Legislation

[Electronic Commerce Act](#) (Chapter 426 of the Laws of Malta)

The Electronic Commerce Act provides for the application of legal requirements to electronic communications and transactions, including electronic contracts. The Act, as originally enacted, transposed into Maltese law the EU Directive [1999/93/EC](#) on a Community framework for electronic signatures, and the EU Directive 2000/31/EC on certain legal aspects of information society services, in particular electronic commerce, in the internal market. The competent regulator appointed to enforce the Electronic Commerce Act, is the [Malta Communications Authority \(MCA\)](#).

In 2016, this Act was amended whereby the national provisions implementing Directive 1999/93/EC were deleted or amended, and new provisions were introduced empowering the Malta Communications Authority as the competent regulator for the purposes of this Act, to act as the supervisory body for the purposes of the Regulation (EU) No. [910/2014](#) on electronic identification and trust services for electronic transactions in the internal market and repealing Directive [1999/93/EC](#). The Regulation harmonises the norms regulating secure electronic interactions between citizens, businesses and public authorities in order to ensure that, for access to cross-border online services offered by Member States, secure electronic identification and authentication is possible, thereby creating a common understanding for the regulation of electronic trust services; namely electronic signatures, electronic seals, time stamp, electronic delivery service and website authentication.

eCommunications Legislation

[Electronic Communications \(Regulation\) Act](#) (Chapter 399 of the Laws of Malta)

The Electronic Communications (Regulation) Act, complemented by various subsidiary laws (notably SL 399.28 of the Laws of Malta), regulates the provision of electronic communications services and networks in Malta. This Act together with the subsidiary legislation made thereunder, transposes the EU Electronic Communications Regulatory Framework, as amended by the EU in 2009, notably: Directive [2002/21/EC](#) ('Framework' Directive); Directive [2002/20/EC](#) ('Authorisation' Directive); Directive [2002/19/EC](#) (Access and interconnection Directive); [2002/22/EC](#) ('Universal service and user's rights Directive'); and certain provisions of Directive [2002/58/EC](#) ('ePrivacy' Directive) falling within the remit of the [Malta Communications Authority](#) (MCA).

eProcurement Legislation

[Public Procurement Regulations](#)

The new National Public Procurement Regulations were published on the 28 October 2016 transposing [Directive 2014/24/EU](#), Directive 2014/25/EU, and Directive 2014/26/EU on public procurement. Besides the substantive provisions related to public procurement and the provisions related to purely electronic tools such as the Dynamic Purchase Systems and the Electronic Auctions, the Regulations, and specifically LN352 of 2016, provide that all procurement procedures conducted by a central purchasing body shall be performed using electronic means of communication, in accordance with the requirements set out in Regulations ([Regulation 23\(4\)](#)).

Moreover, subject to specific conditions specified in the Regulations, all communication and information exchange under the Regulations, including electronic submission, shall be performed using electronic means of communication. The authority responsible for the tendering process shall by electronic means offer unrestricted and full direct access free of charge to the procurement documents from the date of publication of the notice or the date on which an invitation to confirm interest is sent ([Regulations 48 and 49](#)).

Re-use of Public Sector Information (PSI)

[Re-use of Public Sector Information](#)

Legal Notice 20 of 2007, Re-Use of Public Sector Information Order, 2007, issued under the European Union Act (Chapter 460 of the Laws of Malta), transposes into Maltese law the general principles governing the re-use of public sector information, in line with the provisions of the relevant EU Directive [2003/98/EC](#) on the re-use of public sector information.

This Legal Notice has been replaced by the Re-Use of Public Sector Information Act 2015 ([Cap 546 of the Laws of Malta](#)), which transposes the provisions of Directive [2003/98/EC](#) of the European Parliament and the Council of the 17 November 2003 on the Re-Use of Public Sector information, the provisions of Directive [2013/37/EU](#) of the European Parliament and of the Council of 26 June 2013 amending Directive [2003/98/EC](#) on the Re-Use of Public Sector information into national law. The new rules emphasise that, subject to specific conditions, all content that can be accessed under national access to documents laws should, by default, be re-usable. The new Act builds on the provisions and the procedures already in place through the Freedom of Information Act ([Cap 496 of the Laws of Malta](#)).

eGovernment Actors

Main roles and responsibilities

National eGovernment

eGovernment in Malta falls under the remit of the Ministry for Competitiveness and Digital, Marine and Services Economy (MCDMS). The development and implementation of eGovernment policy is coordinated centrally. The strategy is developed with broad stakeholder involvement; services are delivered through a mix of in-house and trusted third parties serving as service-delivery agents and implementation is done in a decentralised manner through Ministerial Chief Information Officers (CIOs).

Policy/Strategy

Malta Information Technology Agency (MITA)

MITA, which falls under the remit of the Ministry for the Economy, Investment, and Small Business was set up in July 2008. MITA is the central driver of Government's Information and Communications Technology (ICT) policy, programmes and initiatives in Malta. MITA's role is to deliver and implement the assigned programmes as set out in the Digital Malta National ICT Strategy 2014 - 2020, and as directed by the Minister for the Economy, Investment and Small Business from time to time. MITA manages the implementation of IT programmes in Government to enhance public service delivery and provides the infrastructure needed to execute ICT services to Government. MITA is also responsible to propagate further use of ICT in society and economy and to promote and deliver programmes to enhance ICT education and the use of ICT as a learning tool.

Coordination

Malta Information Technology Agency (MITA)

MITA serves as the central driver and coordinator of the ICT policy in Malta by becoming the means through which the Government determines its ICT priorities. Thus, MITA prioritises national ICT targets, and embraces open standards and technologies as a matter of policy. Its main strategic goals are to deliver and manage the execution of all programmes, to serve as the central driver of information and communication technology policy, programmes and initiatives in Malta, to promote and deliver programmes aimed at enhancing ICT education and the use of ICT as a learning tool, and to proliferate the further application of information and communication technologies in society and the economy.

The Agency is dedicated in assisting the Government in transforming technological innovations into real business solutions. Its unique approach combines an innovative array of ICT and project management services with focused delivery capabilities using tried and tested methodologies to help fulfil Government's strategies and projects and maximise the benefits of investment in technology.

Ministry for Competitiveness and Digital, Maritime and Services Economy

The Ministry for Competitiveness and Digital, Maritime and Services Economy coordinates the development and implementation of eGovernment policy in the sense that both [Malta Information Technology Agency \(MITA\)](#) and [Malta Communications Authority \(MCA\)](#), the two eGovernment executive agencies, fall under the Ministry's merit, which sometimes intervenes in the coordination process.

Digital Malta Governing Board

The Digital Malta Governing Board will allow for strong governance, which will support the leaders. The Governing Board is entrusted to enable management of the dependencies and interactions between players and mitigate the risks associated with adopting different policies and implementing various actions. The Governing Board, represents the primary stakeholders and reports to the Parliamentary Secretary responsible for Competitiveness and Economic growth.

Implementation

Malta Information Technology Agency (MITA)

MITA implements IT programmes in Government to enhance public service delivery and provides the infrastructure needed to execute ICT services to Government. MITA officially took over the operations of MITTS Ltd, with an extended role to cover projects and services on a national scale. MITA shall, therefore, continue to excel in providing ICT infrastructure and services, professional project management and consulting services to the Government.

Malta Communications Authority (MCA)

Since July 2008, the MCA is responsible for the direct implementation of the actions to upgrade Malta's external ICT environment, to eliminate the digital divide and to promote eCommerce. The Malta Communications Authority (MCA) is placed under the leadership of the MEIB. The work undertaken by MCA is resulting in the better use of resources and in obtaining more effective results.

Technology Direction & eGovernment Department, MITA

The Technology Direction and eGovernment Department within the Malta Information Technology Agency (MITA) is responsible for the overall core Technology strategy and direction, Corporate eGovernment, Identity Management, Enterprise collaboration and specialised research projects.

Programme Management Department, MITA

The Programme Management Department within the Malta Information Technology Agency (MITA) is responsible for the implementation of different strategic sections within Government, mainly Taxation, Customs, Social Security, Police, Justice, Agriculture, Transport, Health and Education.

Support

Malta Communications Authority (MCA)

The MCA is the statutory body responsible for the regulation of the electronic communications sector (telecommunications, radio communications and broadcasting transmission), eCommerce, eSignatures, eInclusion, eBusiness and the postal sector. The MCA's mission, mandate and functions derive from the [Malta Communications Authority Act](#) (Cap 418). The MCA is the National Regulatory Authority (NRA) for these sectors in accordance with EU law which is subsequently transposed into Maltese legislation.

Management Efficiency Unit (Better Regulation Unit)

The Management Efficiency Unit, under which the Better Regulation Unit operates constitutes a separate organisational entity within the Office of the Prime Minister and is primarily tasked with assisting Government Ministries and Departments in the development and implementation of effective change management strategies intended to lead to the improvement of the Government Services. The Unit is also responsible for formulating and coordinating Malta's National Reform Programme within the relaunched Lisbon Strategy, Better Regulation, and Schengen project management. It works closely with the public administration to ensure that Better Regulation principles and procedures are applied consistently throughout the public sector.

Malta's **Better Regulation Strategy** aims to ensure that all public entities take measures to:

- ▶ Continue simplifying and improving existing regulation;
- ▶ Ensure the better design of new regulation;
- ▶ Reinforce the value that regulation should not only be effective but also proportionate;
- ▶ Ensure that the effort is sustained in the long-term;
- ▶ Design and apply better regulation tools and good practice; and
- ▶ Promote a cultural change.

Department of Information

The Department of Information manages the Government [portal](#) and the Public Service intranet.

Audit/Assurance

National Audit Office of Malta

The National Audit Office's mandate consists in the full annual financial and compliance audit of all Government Offices and other public entities. Its mandate was extended to cover independent advisory and investigative powers, the examination of any financial matter concerning the use of public funds, and the performance/value for money evaluation audits of Government Offices, public entities and businesses where the Government constitutes a majority shareholder.

Data Protection

Office of the Information and Data Protection Commissioner

The Office of the Information and Data Protection Commissioner is tasked with ensuring the respect of the individual's right to privacy with regard to personal information and the enforcement of the relevant legislation in the field.

Malta Communications Authority (MCA)

The MCA is the National Regulatory Authority for electronic communications, eCommerce and the postal sector, in accordance with EU law which is subsequently transposed into Maltese legislation. Among the Acts implemented by the MCA is the signature certification of service providers, as defined in the [Electronic Commerce Act](#) (Cap 426).

Regional & Local eGovernment

Policy/Strategy

Local Councils

The Government considers Local Government as a kingpin in the attainment of the first class information society in Malta. In view of this, it established in early 2002 a [Local Council Electronic Policy](#) aimed at offering accessibility to technology and service delivery via the front offices of Local Councils. The policy was planned to be implemented through a partnership between the Government and the Local Councils, whereby Councils opting to participate in this initiative shall be granted a series of benefits related to the proliferation of the information society.

Coordination

Department for Local Government

The Department for Local Government ensures that Local Councils have the legislative authority to respond to local needs and offers administration management. It also acts as a stimulant to the devolution and decentralisation processes. Furthermore, it now serves as a regulatory mechanism for Local Councils' operations.

Implementation

Local Councils

Local Councils implement eGovernment projects falling within their jurisdiction.

Support

Department for Local Government

The Department for Local Government ensures that Local Councils have the legislative authority to respond to local needs and offers administrative support along with statutory funding to 68 Local Councils. It also acts as a stimulant to the devolution and decentralisation processes.

eGovernment Infrastructure

Main eGovernment infrastructure components

Portals

['www.gov.mt'](#) portal

The Government of Malta's portal is at the same time an institutional site and the **official gateway to electronic public services**. It provides access to information, as well as to a number of interactive and transactional services. An A to Z list of Government services can be accessed through the portal. The eGovernment services online are divided into **different clusters and Life Events**. The underlying idea of service clusters is a technique used to bundle government services according to the needs of specific citizen groups / events. Within these links, citizens will find government services structured around their needs, regardless of the Government Department they are located within.

['www.mygov.mt'](#) portal

'mygov.mt' is a web portal where citizens and businesses are able to access Government's services available on the Internet in a **secure** and **integrated** manner. The portal uses a process that allows citizens to log in only once, through a **single-sign on facility**, in order to access all these services. The eID offers a simple method of identification and authentication to access the 'mygov.mt' services via a computer, from one's home, office or Local Council. Furthermore, it is free of charge and available to all ID Card holders, while it does not expire. 'myGov.mt' also provides functionality to citizens who appoint a person of their trust to manage by proxy their eGovernment services. This function is called 'delegation' and the only requirements are that both persons (both in possession of an eID) agree on this arrangement and that the person acting by proxy is acceptable to the Service Provider.

[eForms portal](#)

Another key component in implementing eGovernment, has been the setting up of the eForms platform which enables citizens to electronically submit applications related to Government services. The forms are produced on top of a workflow engine, meaning that information can be collected once at source, and be able to reduce the administrative burden by electronically distributing the forms within Government, tracking progress and informing the applicant accordingly. This platform is also integrated with the government payment gateway, thus ensuring that services can be rapidly developed and deployed to also cater for the financial aspect in a transaction.

[Data Protection](#) portal

This portal, which came to operation in February 2006, enables citizens to access data protection services online.

[Judiciary of Malta](#) portal

The portal of the Judiciary of Malta was launched in October 2009, with the view to provide the public with extensive information resources on the Maltese Judicial System, the Judiciary, the Judges and Magistrates, as well as the courts they sit in. In addition, it offers a latest news section and an insight on the history of the Maltese Judiciary and the important judgements that have taken place. The vision of eGovernment is to continuously enhance its services through the application of various technologies.

[Local Councils](#) portal

The web portal, launched in 2009, aims at empowering the role of local councils and assisting citizens in easily accessing the councils' services. The main objectives for the creation of this web portal are to encourage local councils to effectively interact with the community in general and to provide international users with a valuable tool allowing them to better understand the geo-cultural composition of the Maltese Islands, with their different specificities that prevail in each locality. The portal also promotes the advantages of standardisation, opening the channels of locality-based prioritisation and differentiation.

[Servizz.gov](#) website

Through this website, citizens can submit **queries, suggestions** and **complaints** to public entities regarding the services they offer. Public entities include all Government Departments, Local Councils, as well as Authorities and Public Corporations (e.g. Planning Authority, Enemalta Corporation, Water Services Corporation). An electronic system that links all these entities was created, so that every case can be processed and investigated in the most efficient manner.

Networks

New Generation Networks (NGNs)

The government's plan is to facilitate the implementation of new generation networks (NGNs) and make sure that Malta will not lag back in rendering accessible this technology to all Maltese citizens, possibly taking advantage of the small size of the country and introducing this technology throughout Malta before other countries. Government is working to improve the administrative process which the operators have to pass through in order to introduce new networks. Furthermore, the Government is looking for methods that could help fibre technology arrive to homes and businesses fast. The strategy of technological information aimed to have connected 20% of Maltese homes with new generation networks by the end of 2010.

In July 2008, the Ministry of Infrastructure, Transport and Communication launched a Green Paper on Next Generation Networks in the National Consultation Council. The Green Paper, which focused on fibre technology, exposed all the factors to be addressed by Government and the private sector. This is because the experience gained in other countries showed that the contribution of Government is greater when it encourages fibre-to-the-home (FTTH) projects.

MAGNET

'MAGNET' was implemented in 1995 as the Maltese Government Network connects all Government Ministries, Departments and Agencies, as well as Local Councils, Police Stations, Libraries, Hospitals, Health Centres, Social Services offices and Embassies. This network enabled the Government to **proliferate IT and information society applications** such as email, the Internet, and corporate applications like the Common Database (CdB) and the Departmental Accounting System (DAS), to help facilitate and improve the efficiency of the Public Service. The availability of this network also enabled the Government to launch its eGovernment services. A new network, 'MAGNET II', was launched in July 2005 and partly replaced 'MAGNET'. This **new state-of-the-art network** presents a number of benefits for users compared with its predecessor. In particular, 'MAGNET II' has provided **enhanced bandwidth** per site, offered **better reliability** through strict service level agreements (SLAs), guaranteed 99.8% minimum site availability, fully secure through extensive encryption.

In 2015, the 'MAGNET III' was launched with the main aim to **provide cost effective connectivity services** to Government. By end 2016, all MAGNET II sites have been migrated to the MAGNET III infrastructure. Whilst retaining the strongholds of the MAGNET II, the MAGNET III infrastructure offers **flexible bandwidths** in accordance to client business needs. Another major benefit of 'MAGNET III' is the network's ability to transport **Voice over IP (VoIP)** calls efficiently and effectively between all connected organisations. A **Government-wide intranet** is available to all entities connected to the network. Named 'Malta Public Service Intranet', it allows document exchange and sharing across Ministries and Departments.

eIdentification/eAuthentication

National Identity Management System (NIDMS)

The existing National Identity Management System aims to support the **core identity management processes** including the issuance of electronic identity cards (eID Card), ePassports, biometric visas and residence permits. The Government operates a number of identity management systems, the most important of which being: core database systems, electronic identity (e-ID) infrastructure, an electoral system, a national identity card system and the passport system. However, it should be noted that these and other disparate information systems are not entirely interoperable.

[Electronic Identity \(eID\)](#)

In March 2004, the Maltese Government launched its '**Electronic Identity**'; a **secure key network** that enables citizens to access a number of interactive and transactional eServices requiring strong identification such as VAT, tax and company-related services, as well as social services, online passport requests and online ePayment Gateway. The Electronic Identity is based on the internationally recognised four-tier security model. As of March 2007, the eID had already been implemented and launched up to the second level. The third level, which consists of a **soft PKI digital certificate**, has been implemented as well.

The eID offers a simple method of identification and authentication to access the eGovernment services provided on the '**mygov.mt**' portal. The eID number and password are used to log in, whereas the PIN activation code is used to sign for the first time into 'mygov.mt', to activate one's eID account. The PIN number will be again needed when applying for a **digital certificate** to be able to access the highly sensitive eGovernment services (e.g. submission of VAT or income tax return). Downloading such digital certificate is **optional** and depends on whether the user intends to make use of the sensitive services in question. It is to be noted that the eID is **free of charge**, available to all ID Card holders and it does not expire.

[Electronic Identity Cards \(eID Card\)](#)

The eID Card is an identity card which in addition to the traditional identification features also includes an electronic component which allows the citizen to access an array of electronic services provided by the Government and other third parties.

Maltese nationals who are 14 years of age and older are entitled to an eID Card. The electronic features of the card shall be made available to all card holders with one exception, the signature certificate shall be available to citizens who are 18 years and older.

Residents who are not Maltese nationals, but who are eligible for a residence document or residence permit will have, through such electronic documents, the same eID features as the eID Card. Specifically, EU nationals, spouses of EU nationals and regular third country nationals residing in Malta have the same eID features and accesses as Maltese nationals.

The electronic chip of the eID card holds the same biographic data that is visible on the face of the card, including a digital image of the citizen. The chip includes also two digital certificates for authentication and signatures, and applications for ticketing and electronic purse.

The digital certificate for 'authentication' enables the citizen to log in securely to the eGovernment services. The digital certificate for 'signatures' is an enabler for electronic signatures. These are qualified certificates under the eCommerce Act and the electronic signature will be equivalent to a hand-written signature. Both certificates are protected by different Personal Identification Numbers (PINs).

The eID Card can be used by the citizens to access securely their health information through the eGovernment services, but does not hold any sensitive health data on itself. No fingerprint biometric data is held on the e-ID Card and it does not replace the Voting document issued by the Electoral Commission.

ePassports

Malta's new upgraded ePassport system with Extended Access Control (EAC) capability [went live](#) in June 2010. This new solution delivers a higher level of security and access control, in accordance with EU regulation for all Schengen Member States with the addition of a second biometric - two fingerprints - to the data already stored on the chip. Its delivery is a key milestone in the Government's ongoing strategic identity management plan. Fully integrated with Malta's existing National Identity Management System (NIDMS), EAC capability has initially been launched in Malta and Gozo and then rolled out across all embassy sites.

The issuance of biometric passports initially began, in October 2008 by the [Maltese Passports Office](#). On the occasion of their launch, Minister for Infrastructure, Transport and Communications, Austin Gatt, explained that the new passports contain the same information as the old ones, but the **information** is held in a **more secure manner**, in a chip embedded in the document. In the future, the chip is also planned to carry an image of the holder's fingerprint.

eProcurement

Electronic Public Procurement System (ePPS) platform

The [eProcurement Solution](#) procured by the Government of Malta is the ePPS (electronic Public Procurement System) platform which is supplied by European Dynamics S.A. The platform was launched in July 2011 to facilitate the Maltese Government's transition to online procurement, covering the full lifecycle of public procurement, from the publishing stage to award and execution of contracts. The Solution constitutes an eProcurement platform, comprising a core and a number of eProcurement-specific services, offering several parameterisation capabilities for meeting the exact needs of a Purchasing Authority.

The eProcurement solution will enable actual tender bids to be submitted securely online as well as new possibilities such as 'reverse auctions' where bidders compete to offer the lowest price. Initially the platform will be used by the [Department of Contracts](#) and the [Malta Information Technology Agency](#) (MITA). In the future, it is to become accessible to the private sector as well, which will enable businesses to start submitting bids online.

[Department of Contracts portal](#)

Since the launch of the e-procurement platform for Malta, the Department's portal has taken a different role. Rather than being an interactive site for economic operators to learn about and participate in tender opportunities, it now serves as a window for procurement regulations and policies across Government. Essentially, all the Public Procurement Regulations, Contracts Circulars, Procurement Policy Notes (PPNs) and other Guidance Notes and Manuals of Procedures are available to all. Furthermore, there is also a link to all the tenders published between 2008 and 2012 when the National eTenders [portal](#) took over as the site for tender opportunities.

Knowledge Management

First Initiatives - [The Malta Public Service Intranet](#): Servizz.gov

Launched in April 2003, the 'Malta Public Service Intranet': Servizz.gov is a partnership between Central Government, Local Councils and other Government Entities. These three service providers collaborate to offer a free of charge, one-stop shop that offers all public services online.

Further Steps for Creating a Government-wide Knowledge Management Framework

The Malta Information Technology Agency's [Strategic Plan 2009 - 2012](#) envisages the establishment of a knowledge-management function for IT-and IS-related matters in government, encouraging the sharing of information, best practices, research and related materials to enhance the knowledge and appreciation of decision-makers on the respective subjects. According to the goals set out in Strategic Priority 1, which plans to drive the deployment of an effective ICT Governance Framework within the public sector, Malta is about to adopt and disseminate international best practice in matters related to effective ICT Governance through knowledge management and other educational techniques.

Other Infrastructure

ePayment

ePayment gateway

The eGovernment electronic payment gateway is part of the horizontal infrastructure supporting the Maltese eGovernment. It complements the eID framework in providing a layer for the development of eServices to both Citizens and Businesses. When the first payment gateway was launched in 2003, the number of transactions reached approximately 7600 during the course of the year. In 2007, this amount had already reached about a quarter of a million and the system was completely redeveloped with the new Government Payment Gateway going live in October 2008. According to 2016 figures, the payment gateway handles around EUR 90m per year. The setup offers stability and security. Its contracted availability is 99.85% per month and handling of 8 transactions per second.

eServices development & deployment framework

['eForms' platform](#)

The 'eForms' platform intends to enable Government to rapidly develop and deploy eServices and to tie these into one framework to manage the entire portfolio of public services. An electronic form process may start directly from the 'eForms' platform or through any Government web application using friendly URLs. To keep the integrity of filed documents, all the information within the form, attachments, workflows and transaction are managed and stored within eForms. At the end of the transaction, the content of the form can be supplied electronically to a Service Provider. The platform provides tools for converting the form information to a long term storage format such as PDF/A for records management purposes and to integrate with external systems. This enables a more intelligent input validation, form pre-filling and triggering of external processes. The 'eForms' platform is designed to uniquely combine content, process and connectivity to automate and streamline most records-based activities, eliminate unnecessary end user participation and enforce compliance.

['Notifications' service](#)

As part of the eGovernment strategy to enhance citizen communication with the Government, the service provides timely notifications and alerts to citizens on their services of interest, now reaching approximately 60 eServices, through multiple delivery channels. The 'Notifications' service provides citizens with a one-stop shop to all notifications by email and SMS provided by eGovernment services, allowing citizens to be notified on various Governmental services instantly.

eGovernment Services for Citizens

Availability and sophistication of eServices for Citizens

The information in this section presents an overview of the basic public services, which were identified by the European Commission and Member States under the [Your Europe initiative](#) that is an EU site designed to help citizens do things in other European countries – avoiding unnecessary inconvenience and red tape in regard to moving, living, studying, working, shopping or simply travelling abroad.

The groups of services for citizens are as follows:

1. **Travel**
2. **Work and retirement**
3. **Vehicles**
4. **Residence formalities**
5. **Education and youth**
6. **Health**
7. **Family**
8. **Consumers**

1. Travel

Passenger rights, documents you need

Passport

Responsibility: Central Government, Ministry for Justice, Culture and Local Government

Website: <http://www.passaporti.gov.mt/>

Description: The website of the Ministry for Justice, Culture and Local Government provides all the information required to assist a Maltese citizen to acquire a Maltese passport, while forms may also be downloaded in PDF format.

Money and charges

Customs Electronic System (CES)

Responsibility: Department of Customs, Central government

Website: <https://customs.gov.mt/>

Description: Customs Electronic System (CES) of Malta is composed of the following online services that enable customs-related services online: Import System, National Export System (NES), Excise Movement Control System, SD External and Manifest system.

2. Work and retirement

Working abroad, finding a job abroad, retiring abroad

Job search services by labour offices

Responsibility: Central Government, Jobsplus

Website: <http://jobsplus.gov.mt/>; <http://www.gov.mt/>

Description: Jobsplus offers job recruitment related services to employers and job seekers. The service enables job seekers to use a search facility for jobs; to submit CV and online applications and receive electronic alerts for vacancies that match a particular profile.

Professional qualifications

Legal information system (incl. information on the regulated professions)

Responsibility: Ministry for Justice, Culture and Local Government

Website: <http://www.justiceservices.gov.mt/>

Description: The 'laws of Malta' website is one of the services offered by the Ministry for Justice, Culture and Local Government. This service brings together a collection of all the Laws of Malta, including the Constitution, the Statute Law Revision Act, 1980 and subsidiary legislation. The service is free of charge, has unlimited use and presents no fees whatsoever to download copies of all the Laws of Malta in pdf format.

Taxes, unemployment and benefits

Unemployment benefits

Responsibility: N/A

Website: N/A

Description: In Malta, there is no need to apply for unemployment benefits as these are automatically received by those who register as unemployed with Jobsplus. The services provided by Jobsplus are extensive and available online.

Income taxes: declaration, notification of assessment

Responsibility: Central Government, Inland Revenue Malta

Website: <http://www.ird.gov.mt/>; <http://www.gov.mt/>

Description: Individual taxpayers may submit their Income Tax Return, view their Tax Statements, Income Tax Return Status and to make Income Tax Payments over the Internet. Continuous business process re-engineering has, however, almost eliminated the need for employees to complete a tax declaration since this is deducted at source by the employer.

3. Vehicles

Driving licence

Driver's licence

Responsibility: Central Government, Ministry for Transport and Infrastructure, Transport Malta

Website: <http://www.licenzji-tas-sewqan.gov.mt/>; <http://www.transport.gov.mt/>, http://www.mti.gov.mt

Description: In 2008, the Transport Malta launched this service to allow for an electronic intake, the application of driving licenses and international driving permits.

Registration

Car registration (new, used, imported cars)

Responsibility: Central Government, Ministry for Transport and Infrastructure, Transport Malta

Website: <http://www.vehicleregistration.gov.mt>;
<http://www.transport.gov.mt/>; <http://www.mti.gov.mt>

Description: This service allows for end-to-end transparent car (and applicable registration tax) valuation and direct online registrations of new, used and imported cars. The obligatory license plate and road license can be applied and paid online through this website.

4. Residence (and other) formalities

Documents and formalities

Announcement of moving (change of address)

Responsibility: Central Government, Office of the Prime Minister, Department of Information

Website: <https://www.gov.mt/en/>

Description: The web portal 'Moving Home' facilitates the notification process when a person or a business organisation relocates to a new address or when the road numbering scheme changes. The user selects entities that s/he wishes to notify.

Certificates (birth, marriage): request and delivery

Responsibility: Central Government, Ministry of Justice, Culture and Local Government

Website: <http://www.certifikati.gov.mt/>

Description: The Certificates' portal provides the information needed to obtain a civil status certificate based upon the records of the Public Registry. Certificates of birth, marriage and death may be ordered and payment be affected online.

Criminal Record Certificate

Responsibility: Central Government, Malta Police Force

Website: <https://www.gov.mt/en/Services-And-Information/eforms>

Description: Maltese citizens can obtain a Conduct Certificate by calling personally at the Criminal Records Office at the Police General Headquarters in Floriana or else proceed to fill in this electronic form.

Declaration to the police (e.g. in case of theft)

Responsibility: Central Government, Malta Police Force

Website: <http://www.pulizija.gov.mt/>

Description: The Police portal allows citizens to submit reports on crimes and incidents to the Malta Police Force. The website states the nature of crimes and incidents that may be reported, as well as the limits on monetary value of the crime or incident that may be made online. Citizens may also submit information on non-urgent criminal activities, or any other public safety concerns.

Housing (building and housing, environment)

Responsibility: Central Government, Planning Authority

Website: <http://www.pa.org.mt/home?l=1>

Description: Malta Environment & Planning Authority's eApplications was a European eGovernment Awards finalist in 2007. It is a building and renovation permission case handling tool, offering: (1) online application submission and payment; (2) digital case and file handling; (3) documentation for viewing by the applicant.

Passport

Responsibility: Central Government, Ministry for Justice, Culture and Local Government

Website: <http://www.passaporti.gov.mt/>

Description: The website of the Ministry for Justice, Culture and Local Government provides all the information required to assist a Maltese citizen to acquire a Maltese passport, while forms may also be downloaded in PDF format.

5. Education and youth

School, university

Enrolment in higher education/university

Responsibility: University of Malta

Website: <https://esims.um.edu.mt/esims/ipp/appindex.html>

Description: The University started to accept online applications for all its courses in the academic year 2007-2008. The full case-handling system (called eSIMS) allows the application to be submitted, processed, and the decision and delivery of the notification to the student to be completely handled electronically.

Public libraries (availability of catalogues, search tools)

Responsibility: Central Government, Ministry of Education and Employment, Libraries & Archives Department

Website: <https://www.maltalibraries.gov.mt/>;
<https://www.maltalibraries.gov.mt/publiclibrary/opac/>

Description: The Public Libraries' website contains the Libraries Online Catalogue which may be accessed by users. A title may be searched and a list of libraries from where it can be loaned is provided.

Student grants (Student Finance)

Responsibility: Central Government, Ministry of Education and Employment

Website: <http://www.education.gov.mt/>

Description: The service provides information on grants' eligibility and a list of authorised dealers. Applications are fully handled by electronic means.

Traineeship, volunteering

Internships, summer internships, traineeships

Responsibility: Central government, The Ministry for Education and Employment

Website: <http://www.youth.org.mt/?>

Description: Youth Employment Portal (EYP) provides information and guidance for the youth in regard to the job search and employability and has been specifically designed for the needs of the young jobseeker (16 to 24 years of age). If you are a youth registered on the website, you can upload your CV and apply for jobs directly through this website. By being registered on this website you can also make an appointment online with guidance professionals, youth workers or psychologists.

Researchers

Information and assistance to researchers

Responsibility: EURAXESS Malta

Website: <http://www.euraxess.org.mt/>

Description: EURAXESS Malta provides information and assistance to mobile researchers – by means of the web portal and with the support of our national EURAXESS Service Centres. The portal contains practical information concerning professional and daily life, as well as information on job and funding opportunities.

Research funding support

Responsibility: N/A

Website: <https://foreignaffairs.gov.mt/>

Description: Most scholarship opportunities are published by the Ministry of Foreign Affairs.

Public libraries (availability of catalogues, search tools)

Responsibility: Central Government, Ministry of Education and Employment, Libraries & Archives Department

Website: <https://www.maltalibraries.gov.mt/>;
<https://www.maltalibraries.gov.mt/publiclibrary/opac/>

Description: The Public Libraries' website contains the Libraries Online Catalogue which may be accessed by users. A title may be searched and a list of libraries from where it can be loaned is provided.

6. Health

Planned and unplanned healthcare

Health related services (interactive advice on the availability of services in different hospitals; appointments for hospitals)

Responsibility: Central Government, Ministry for Energy and Health

Website: <http://www.ehealth.gov.mt/>

Description: The eHealth portal allows the citizen to use a large number of health-related services such as Registration as a Blood Donor, the lodging of a complaint related to public-health and information on the roster of pharmacies open on Sundays and Public Holidays. The portal also has a vast patient electronic library (A.D.A.M.) with varied health-related information. Users in general can apply for the European health insurance card.

myHealth portal

Responsibility: Ministry of Health

Website: <https://myhealth.gov.mt/>

Description: Patients and doctors can access health data through this site. The following data can be accessed: Mater Dei Hospital (MDH) Case Summaries (inpatient discharge letters from 2008 onwards), Current Pharmacy of your Choice medicines entitlement, Lab results and medical image reports (Biochemistry, Haematology, and Immunology. Toxicology from 2008 onwards; Microbiology, Virology, Blood Bank, Histology and Cytology from December 2012 onwards), and future outpatient / clinic appointments at Government Hospitals (as supplied by the Patient Administration System).

When living abroad

Healthcare abroad

Responsibility: Ministry of Health

Website: <https://www.gov.mt/en/Services-And-Information/eforms/>

Description: The purpose of the EHIC is to facilitate access to medical care during the holder's temporary stay in another Member State, and to speed up reimbursement of the costs incurred. The European Health Insurance Card (EHIC) is free and can be request online as an eService. Alternatively the form can be downloaded from the portal to be send by post, or found at the Entitlement Unit and any Local Council to be filled it.

7. Family

Children, couples

Child allowances

Responsibility: Central Government, Ministry for Family and Social Solidarity

Website: <http://socialpolicy.gov.mt>

Description: The [portal](#) of the Ministry, responsible for Social Policy, offers a wide and varied list of social security services online, including the ability to register for Children's Allowance.

Certificates (birth, marriage): request and delivery

Responsibility: Central Government, Ministry for Justice, Culture and Local Government

Website: <http://www.certifikati.gov.mt/>

Description: The Certificates' portal provides the information needed to obtain a civil status certificate based upon the records of the Public Registry. Certificates of birth, marriage and death may be ordered and payment be affected online.

8. Consumers

Shopping (your rights), unfair treatment

Consumer Affairs

Responsibility: Central Government, Ministry for Social Dialogue, Consumer Affairs and Civil Liberties.

Website: <http://www.mccaa.org.mt>

Description: The Malta Competition and Consumer Affairs Authority (MCCAA) assists consumers and provides mediation between consumers and traders. The Authority is also responsible for ensuring observance of consumer related legislation falling within the jurisdiction of the Office for Consumer Affairs Act.

eGovernment Services for Businesses

Availability and sophistication of eServices for Businesses

The information in this section presents an overview of the basic public services, which were identified by the European Commission and Member States under the [Your Europe initiative](#) that is an EU site designed to help citizens do things in other European countries – avoiding unnecessary inconvenience and red tape in regard to doing business abroad.

The groups of services for businesses are as follows:

1. **Start and grow**
2. **VAT and customs**
3. **Selling abroad**
4. **Staff**
5. **Product requirements**
6. **Finance and funding**
7. **Public contracts**
8. **Environment**

Description: The Environment and Resources Authority is responsible for environmental planning and issuing of permits in three different streams; Industrial, Nature and Waste Management. These are required in order to safeguard the environment from impacts arising from different human activities. This portal provides a complete suite of information.

European Commission

The factsheets present an overview of the state and progress of eGovernment in European countries.

Joinup is a joint initiative by the Directorate General for Informatics (DG DIGIT) and the Directorate General for Communications Networks, Content & Technology (DG CONNECT).

Contributor: Monique Piccione, Consultant at Malta Information Technology Agency (MITA); Malta.

Production/Publishing: ISA Editorial Team, Wavestone Luxembourg S.A.

An action supported by ISA²

ISA² is a EUR 131 million programme of the European Commission which develops digital solutions that enable interoperable cross-border and cross-sector public services, for the benefit of public administrations, businesses and citizens across the EU.

ISA² supports a wide range of activities and solutions, among which is the National Interoperability Framework Observatory (NIFO) action. NIFO provides information on interoperability activities in Europe and is in charge of eGovernment factsheets' annual updates.

ISA² solutions can be used free of charge and are [open source](#) when related to IT.
