First virtual breakfast on Better Legislation for Smoother Implementation!

On the menu: Digital-ready policymaking

July 8th 2020

Agenda

- Who we are
- Digital-ready legislation
- Next steps

Who we are

Zsafia Sziranyi
Zsafia.SZIRANYI@ec.europa.eu

Cecile Guasch
Cecile.GUASCH@ext.ec.europa.eu

Isa Katharina Von Kalben
Isa-Katharina.VON-KALBEN@ec.europa.eu

Where we come from

The ISA² Action 2016.23. Legal Interoperability, under the ISA² programme, aims to facilitate the implementation of the European Interoperability Framework (EIF) recommendation on legal interoperability. Concretely, the action aims to address the political call "to fully integrate digital considerations into existing and future policy and regulatory initiatives", as it was expressed by the ministers in charge of e-Government policy across the European Union in their [Tallinn declaration](#) on 6 October 2017.

Through our contacts with different actors at the EU and national level, our team realised that:

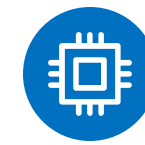

Lack of awareness to ensure digital-ready legislation and fostering legal interoperability

Obstacles and burdens to implement policies in a cross-border landscape

Different practices and actors across policy-making institutions

Silos prevent knowledge and inspiring practices to be shared

Our target audience and objective

LEGISLATIVE

Stakeholders defining public policy goals in response to societal problems involved in the legislative process at European, national, regional and local level.

e.g.: *Commission policy makers*

DESIGN / BUSINESS

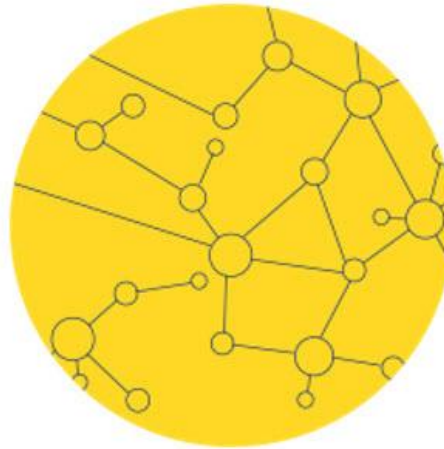

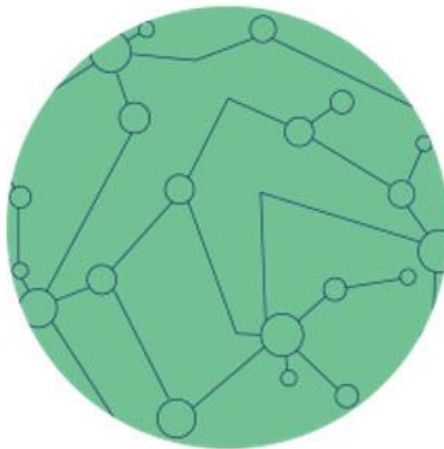

Stakeholders, knowledgeable in the sector impacted by legislation, involved in designing the activities supporting the achievement of policy goals. They identify opportunities for improving the business process at stake.

e.g.: *Decision makers, Business architects*

OPERATIONAL

Stakeholders involved in implementing business solutions in compliance with legislation. They may foster the review of a legislation since they have the ability to detect more efficient ways to implement legislation.

e.g.: *IT practitioners at a service provider, European or National agency*

Our objective is to build connections between the various segments and create a common universe

Our vision

Our community

A multi-disciplinary community on better legislation to share good practices and co-create tools with interoperability in mind

Main pillars – so far:

- Digital-ready policymaking
- Technology and legislation

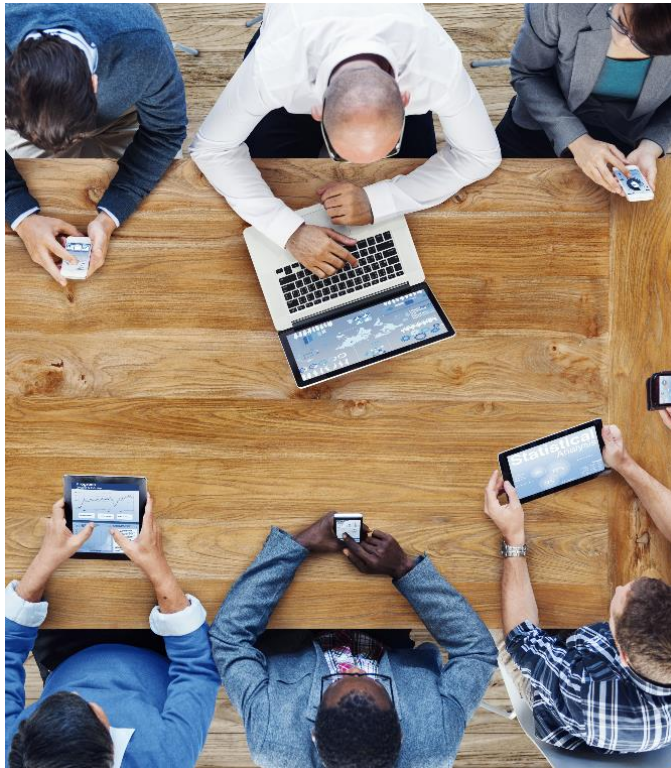

Our activities:

- Share knowledge and best practices around these topics
- Connect people through different events, training and discussions
- Provide a light training on these topics

Join us [here](#) and [subscribe to our newsletter!](#)

We want to get to know you

**Let's use the Mentimeter
so you can tell us about...**

- Your background
- Your expectations for this breakfast session 😊

Do you see yourself in any of the segments we presented?

- Legislative
- Design/Business
- Operational

 **Mentimeter**

Take your phone and go to www.menti.com

Use the code **59 63 75**

Where do you come from and what are your expectations for today's session?

Digital-ready legislation

Digital-ready legislation

Legislation regulating
the digital environment

Legislation regulating
other environments
having digital in mind

Legislation that is
created with the use of
digital solutions

What do you think digital-ready legislation is about?

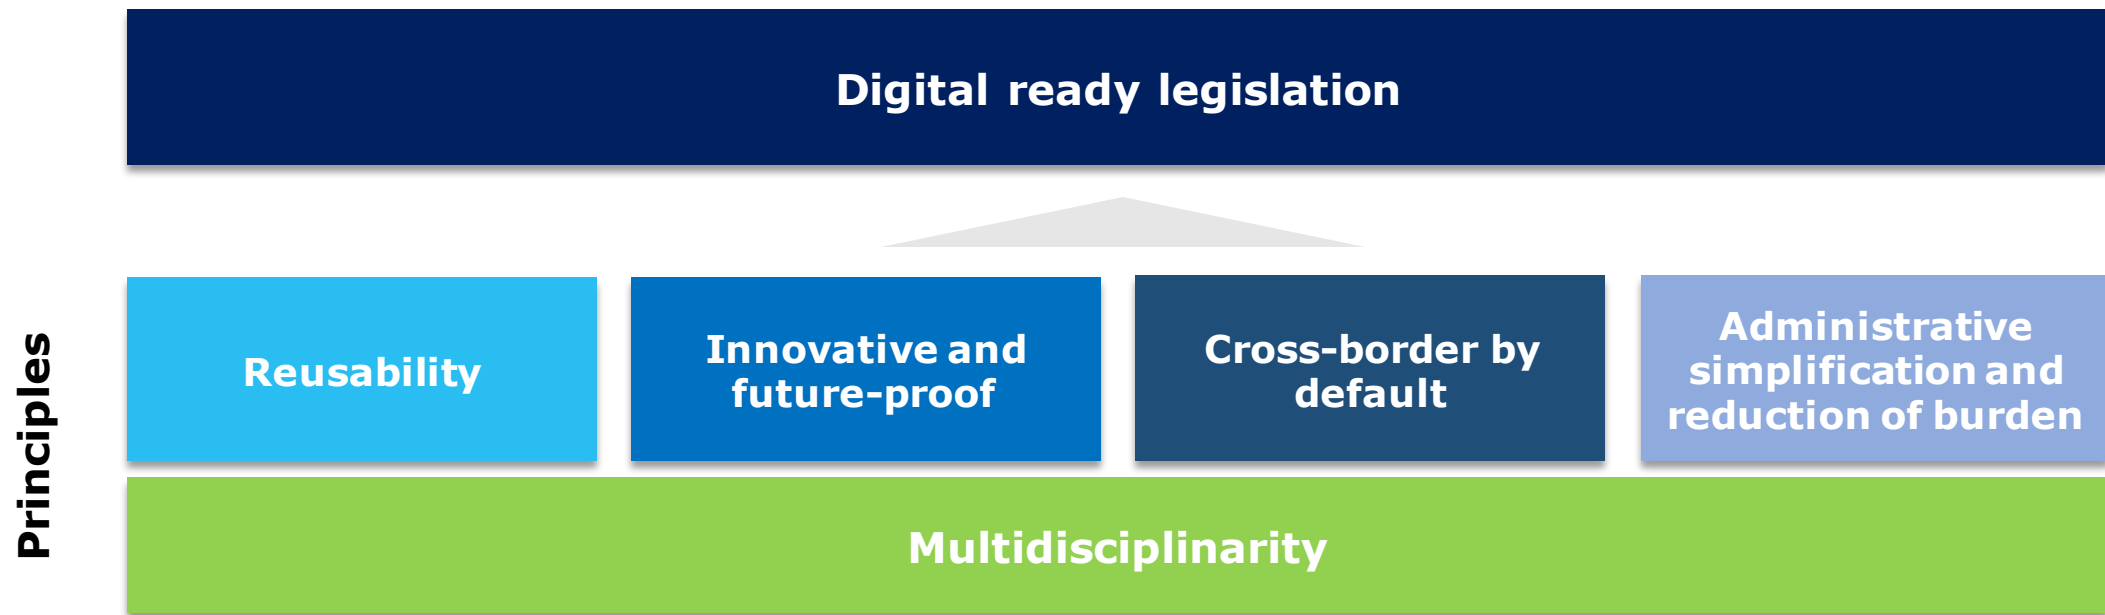

- Legislation regulating the digital environment
- Legislation regulating other environments having digital in mind
- Legislation that is created with the use of digital solutions
- All of the above

Take your phone and go to www.menti.com

Use the code **80 90 33**

Our principles

What principles of digital-ready legislation would you propose?

[Free text]
